# John Harvey Kellogg Papers (Collection 006)

## Biographical Information

John Harvey Kellogg (1852-1943) was one of sixteen children born to Seventh-day Adventist parents in the farming community of Tyrone Michigan. After completing high school in a single year, the prodigious student entered Bellevue Hospital and Medical College in 1872. He soon decided to pursue the field of medical education instead of medical practice, believing that medical education would more fully prepare him for a life of missionary work for the Seventh-day Adventist Church. Following his graduation from medical school in 1875, Kellogg returned to Battle Creek to assume control of the financially troubled Health Reform Sanitarium, for one year. He remained there until his death in 1943.

The operators of the Sanitarium believed that a diet of meat substitutes derived from various grains and nuts offered their patients a better cure than did drugs. Dr. Kellogg developed these substitutes and found a myriad of other uses for grains and nuts. Peanut butter, granola, and a process for flaking grains are inventions for which we remember him most.

Kellogg's association with Seventh-day Adventists comprises the bulk of the material in his private papers. Kellogg was himself a Seventh-day Adventist, and was instrumental in the establishment of what is now a world-wide system of Adventist health care. In 1903, he published a book entitled *The Living Temple*, which the Adventist church found to be at odds with its doctrines. A split soon developed, pitting Kellogg and his supporters against the Adventist leadership and laity. Kellogg succeeded in wresting control of the famous Battle Creek Sanitarium from the Church and placing it under a board controlled by himself.

Kellogg was one of the most forceful and effective leaders of the Seventh-day Adventist Church. He was a good friend of James and Ellen White, though he later grew cool to her when his theology was called into question.

## Scope

This collection consists of Dr. Kellogg's correspondence with Seventh-day Adventists.

## Arrangement

Where possible the material has been kept in the arrangement conceived by the donors. See the inventory for more information on the arrangement.

## **Provenance**

The original copies of Dr. Kellogg's papers ended up at the University Archives and Historical Collections Department, Michigan State University, East Lansing, Michigan. The Andrews University photocopies were made with the cooperation of William H. Combs, Director of the Michigan State Historical Collections Department. Andrews University acquired these copies in 1978.

## **Use**

All users of this collection will be required to complete the "Application to Use Unpublished Records," and to observe the regulations specified in the "Patron Agreement" and in the "Researcher's Code of Conduct." All records in this collection are open and available for research. Citation for this collection:
