

The

CUMBERLAND

ECHOES

1950

Published by the Students of
MADISON COLLEGE
Madison College, Tennessee

Foreword . . .

EVERY book that was ever planned had a motive behind that planning. The editors of this book also have a motive—to depict the life and activities of our school, a school which is dedicated to prepare young men and women for service to God and humanity.

Our guide is the Bible. From it we learn to improve our present life and how to secure the future life. These precious truths make us a happy, joyful people. Sunshine should abound in our lives. The days spent in school are busy ones, but they are promised God's blessing if lived for Him.

"God will accept the youth with their talent, and their wealth of affection, if they will consecrate themselves to Him. They may reach to the highest point of intellectual greatness; if balanced by religious principle they can carry forward the work which Christ came from heaven to accomplish, and in thus doing, be co-workers with the Master."

It is our sincere desire that this book may in some measure be instrumental in bringing many young people to realize the treasure of a Christian education. To some it will bring hopes of such an education, and to those who have attended Madison College this year, may it bring fond memories.

THE EDITORS

Come Madison, great work yet lies ahead,
Gird up thy loins, do that which God hath said.
Wake up! Wake up! and take the task in hand,
Send out thy youth to Earth's remotest land.

Come Madison, all this is from above,
Back to the soil, remember thy first love.
To help the sick, the grandest work we see,
And teach thy sons to self-supporting be.

This dark old world hath need of these things now.
Proclaim the truths which God did thee endow.
The time is short and urgent is the call.
Awake! Awake! before the night doth fall.

We thank Thee Lord, that we have heard Thy call.
Accept us now, we give to Thee our all.
And bless Thy Church, to lighten all the world.
In every place Thy banner be unfurled.

JAMES G. RIMMER

Dedication

W. E. Straw, M. A.

President

Above our remembrance of you, Elder Straw, as our president, will be the remembrances of you as our teacher and friend. We dedicate this yearbook to you as evidence of our appreciation for your advice, your ideals of the true principles of education which prepare us for the heavenly school. We wish to pay tribute to you for your many years of service as a foreign missionary, and as an educator in the denomination. It is our prayer that your full reward will be realized, when through your untiring efforts, you may see your students of this earthly school surrounding the great white throne.

We Honor

Few of us in this modern age have only the remotest acquaintance with sacrificing. If we are truthful, we must admit that we enjoy many luxuries. We cannot comprehend what it means to pioneer, to have in our hearts a burning desire to promote a project at the cost of eliminating all personal gains and pleasures, and conveniences.

Any person who has dared to present new ideas in this world has met with the drawback of cynical friends, well-meaning friends who are always content with what they have.

Many years ago, God impressed a young man that our system of education should be improved. This impression was not to lie dormant in his mind. Others of the denomination were also impressed. Sister White received instruction from heaven in regard to these new ideals for training youth. These ideals placed labor on a dignified level, the Bible as our main text book, country living as essential, especially if one is self-supporting. This term, "self-supporting" should mean much to us. It should mean enough that we will be active in starting other institutions of learning combined with the medical work.

In this short review, we pay tribute to those who were its founders: Dr. E. A. Sutherland, the young man who years ago was impressed to start this school, became its first president, and served faithfully for years. He pioneered and sacrificed and we extend our humble appreciation. In paying this tribute to him, we include the many others whose heroic sacrifice help build Madison College. We thank God for you, pioneers of Madison College.

Dear young people, may we in our busy everyday pursuit of knowledge, not be so engulfed with formalities that we fail to recall the purpose for which this school was established. We, as youth, may learn much from those who have gone before us. Let us not be blind youth, but youth who have the eyes of our minds open to receive the truths God, in His goodness, has given to us.

We also pay tribute to the work of The Layman Foundation, organized by Mrs. Lida Funk Scott and others, for the purpose of helping make possible the physical plant of many small medical and educational institutions throughout the Southland for Madison-trained workers to operate.

DONALD W. WELCH
President

MARY CHARLES SCOTT
Secretary-Treasurer

WORTH LOWDER
Vice-President

THE Senior CLASS

MARY CHARLES SCOTT
TENNESSEE

Major: Secretarial Science
Minor: Elementary Education

Mary Charles was born and reared near Knoxville, Tennessee. Following her graduation from the Little Creek High School, she spent a year at Southern Missionary College. She has been at Madison College the past three years. After finishing her present course, Mary Charles plans to be a Christian teacher or secretary.

WORTH LOWDER
NORTH CAROLINA

Major: Accounting
Minors: Social Science and Physics and Mathematics

Worth has had a wide experience, in textile work, colporter work, and office work. Prior to his coming to Madison in 1947 he attended Southern Missionary College for one year; in 1949 he married Jean Sharpe who is a registered nurse working in the sanitarium. He plans to work in the business office for two more years.

ROBERT AMMUNDSEN
MINNESOTA

Major: Agriculture
Minor: Industrial Arts

Robert came to Madison College from Walla Walla College and Academy where he was very active in extra-curricular activities. At Madison he has served on the Student-teacher council and the Government Committee. His ambition is to teach agriculture and Industrial Arts.

RALPH P. BAILEY
NEW MEXICO

Major: Agriculture
Minor: Religious Education

Reared on a cattle ranch in New Mexico, Ralph considers himself to be a country boy, and therefore has chosen to answer the call of service in the field of agriculture.

CARL EDDY BAKER
FLORIDA

Major: Nursing
Minor: Industrial Arts

Carl graduated from the Madison College Academy. After two and a half years of service in the Army Medical Corps he returned to Madison to continue his education.

DONALD W. WELCH
NEBRASKA

Major: Chemistry
Minors: Biology and Social Science

Donald has made Madison College his home since he entered School here as a student in the second grade. He finished the Medical Technology and X-ray courses in 1947. In 1948 he married Joyce Jones who is finishing the nurses course this year. He plans to remain at Madison College as head laboratory technician and instructor in medical technology.

ROBERT AMMUNDSEN

RALPH P. BAILEY

CARL EDDY BAKER

DEAN EDWARDS

JOEL A. EVERETT

WILBURN GETZLAFF

DEAN EDWARDS
CALIFORNIA

Major: Industrial Arts
Minor: Education

Dean was born in St. Helena Sanitarium in California but while he was still a small child his parents were called to South Africa as Missionaries and there he spent 21 years of his life. He completed Junior College at Helderberg College. On completing a course in Industrial Education and a course in X-ray he plans to return to South Africa as a Missionary.

JOEL A. EVERETT
MISSISSIPPI

Major: Industrial Arts
Minor: Social Science

Joel comes to Madison College from the deep South. His education was interrupted for two and a half years by serving in the U. S. Medical Corps. Following his graduation he plans to teach in the Industrial Education Department and operate the cabinet shop at Madison College.

WILBURN GETZLAFF
CALIFORNIA

Major: Industrial Education
Minor: Art (Music)

Wilburn was born in Los Angeles, but he spent seven of his early years with his Missionary parents in Japan. He graduated from Laurelwood Academy. Attended Pacific Union College and Walla Walla College before he came to Madison College.

ERNEST GORDON
MAINE

Major: Chemistry
Minor: Biology

Ernest came to Madison from New England. He served his country for four years during the war. After his discharge he entered Madison College and now is graduating as a Medical technologist.

JOHN B. GRAMYK
CANADA

Major: Nursing
Minors: Bible, Biology

Saskatchewan, Canada, was the home of John before he came to Madison. He is a graduate of Canadian Junior College and is now completing the nurses' courses. His objective is to study anesthesia and answer the call to mission work.

AGNES JOHNSON
IOWA

Major: Nursing
Minor: Education

Mrs. Johnson has finished her education while caring for her family, and while she enjoys nursing, it is her family that will receive her undivided attention from now on. Her work in Madison College pre-school has been very commendable.

ERNEST GORDON

JOHN B. GRAMYK

AGNES JOHNSON

HENRY KNAPP

JEAN SHARPE LOWDER

LUTHER A. MAY

THE Senior CLASS

HENRY KNAPP
MONTANA
Major: Nursing
Minor: Religious Education

Henry considers Washington as his home, although he bean life in Montana. He spent four years with the army as a medical corpsman. After receiving his degree, in nursing, Henry plans to enter the Norwegian American School of Anesthesiology in Chicago to take advanced work.

JEAN SHARPE LOWDER
MASSACHUSETTS
Major: Nursing
Minor: Religious Education

Because Jean has lived in Tennessee since 1934 she considers herself to be a "Southern Yankee." She finished the nurses' course at Madison in 1945. Since 1947 she has been a supervisor in the sanitarium, and is now graduating with a B.S. degree.

HERBERT PEREZ

WILLIAM F. SCHWAB

LUTHER A. MAY
FLORIDA
Major: Lay Evangelism

Minor: Business Administration and Industrial Education
As president of the Student-teacher council, editor of the CUMBERLAND ECHOES for two years, labor supervisor, and deputy sheriff, Luther has become well known on the campus. Besides serving his country for three and a half years he has done colporteur work and he worked at the Florida Sanitarium for three years. Luther has answered the call to be the superintendent of the Sanitarium and Hospital at Pisgah near Asheville, North Carolina.

HERBERT PEREZ
NEW YORK
Major: Biology
Minor: Chemistry

Herbert graduated from Plainfield Academy in New Jersey, and he came to Madison College in 1946. He married Louise Williamson in 1947. It is easy to recognize Herbert as a proud father when he is with his curly headed little son.

WILLIAM F. SCHWAB
GERMANY
Major: Nursing
Minor: Religious Education

Although he was born in Germany, William has always been an American citizen. After receiving his degree in nursing he took the course in physical therapy at Loma Linda. He has worked as a physical therapist at the Veteran's Hospital, but he is now finishing his college work.

GEORGE TSAO
CHINA
Major: Biology
Minor: Chemistry

George Tsao came to Madison across the blue waters from Canton, China. While there he attended the Academy and Junior College, but he is a graduate of Sam Yu College which is located in Hong Kong. He has attended Madison since 1949. His future plans are to work on his M.A. degree at Peabody College in Nashville, Tenn.

STEPHEN TSAO
CHINA
Major: Industrial Education
Minor: Religious Education

Stephen came to Madison from China where he graduated from the Chinese Training Institute. Before coming to Madison College in '47 he visited Canada for about a year. Stephen's parents have been Missionaries in the Hainan Islands for about 25 years and it is his ambition to also become a missionary. Stephen plans to work for an M.A. in industrial education and then to return back to his homeland and serve his people.

Religious Life

Missionary Volunteer Society

The Friday evening Missionary Volunteer meeting is the highlight of the week. This organization of Missionary Volunteer's provides opportunity for the young people to do missionary work in many ways. These services are conducted by and for the students and have proved valuable in helping them to become leaders of other young people.

Worship Services

"The hours of morning and evening worship should be the sweetest and most helpful of the day." Messages to Young People. This is true of the worship periods at Madison College. Long will the students remember these devotional periods with their faithful deans

SUNSHINE BAND

The Sunshine Band that goes out each Sabbath afternoon shedding rays of sunshine in song to our patients in the Sanitarium.

ELDER G. A. COON, Pastor

Our appreciation goes to our pastor Elder Coon, who has, through another year been a faithful worker for Christ, and a friend to all of us on the campus.

CORRESPONDENCE BAND

The Correspondence Band which writes to persons leaving the Sanitarium, endeavoring to get them to take the "20th Century Bible Course" and to give them words of cheer. Over 3,000 persons have been contacted this way during the past year.

DORCAS SOCIETY

The faithful Dorcas Society during the past year have given away barrels here at home and sent 112 boxes overseas. Here pictured are some of our sisters and brethren helping to pack the boxes. The ladies have also used a great deal of money to buy food for the needy here at home and abroad.

Senior Nurses

ELOISE PAGE

MONTANA

Plans to do Obstetrical or Psychiatric Nursing in the future. President of class in Senior year. President in Junior year.

JOYCE WELCH

ARKANSAS

Born in Arkansas but home is in California. After graduation plans to enter into Surgical Nursing. Vice-President of the class in Senior year.

JO SPRAGUE

TEXAS

Born in Texas City, Texas. Plans to do office nursing. Vice-President in Junior year; Secretary in Senior year.

JOHN GRAMYK

CANADA

Born in Yorkton Saskatchewan, Canada. Anesthesia and mission fields are his great objectives in the future. Treasurer in Senior year. Treasurer in Freshman year.

CARL EDDY BAKER

FLORIDA

Born in Bradenton, Florida. He plans to work for the rural people of the Southland.

BETTY BURK

TEXAS

Born in Corpus Christi, Texas. After graduation she would like to take post graduate work in anesthesia.

AUDREY BURSLEY
OHIO

Born in Wakeman, Ohio. Plans to work here a few months following graduation then to get married. Would like to be a staff nurse in a Michigan Hospital. Secretary in Junior year.

BERTHA DUNN
CALIFORNIA

Southerner by birth but reared in California. Plans to be a supervisor in surgery at Madison Sanitarium and Hospital. Secretary in Freshman year.

GOLDIA DURICHEK
CHICAGO, ILLINOIS

Plans to go to Collegedale, Tennessee and take post graduate work in surgery.

HENRY KNAPP
MONTANA

Born in Plains, Montana but calls Washington his home. After graduation he plans to enter the Norwegian American Hospital School of Anesthesiology in Chicago.

DOROTHY LOWDER
NORTH CAROLINA

Plans to nurse at the Fountain Head Sanitarium, Fountain Head, Tennessee after graduation.

VIOLET ROOK
OHIO

Plans to get married and work here while getting her B.S. degree.

MAVIS SUTHERLAND
WISCONSIN

Born in Wisconsin but has lived in Tennessee for past twelve years. She is interested in Educational Nursing. Hopes to become a nursing instructor at Madison Hospital.

VIOLET STEWART
CUBA

Born in Comaguay, Cuba but claims Texas, Florida and Tennessee. After working here and getting her B.S. degree she plans to become a missionary nurse. President in Freshman year.

Activities

The choir has played a large part in the activities of many students this year. The organization of a choir has filled many purposes. It has served as a means of relaxation and recreation, along with the hard work. The students raised most of the money for their robes, and some of the young men constructed the risers. The choir made numerous trips, the longest one being to three of our Self-Supporting Units, Little Creek, Pisgah, and Fletcher. It was at these schools that the young people received the full vision of the opportunities before them to serve the Lord in a self-supporting work.

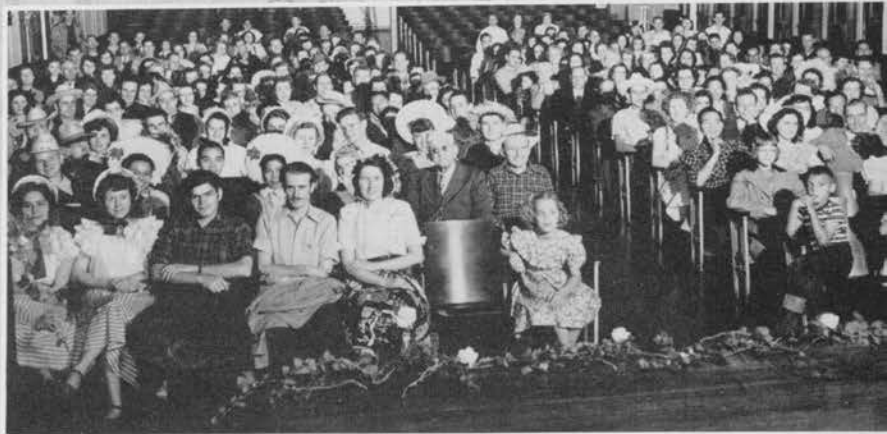

They sang in these places, not to receive personal glory, but to glorify God through song, and in thus doing, were inspired and filled with the desire to soon be a part of our self-supporting work.

A skit given in chapel did much to inspire students to want an annual. "Father" Worth Lowder, and "Mother" Jacque Bartley, and the rest of the Family welcomed "Son" Larry Hawkins home from college.

Courtesy Week was climaxed by the crowning of the King, Fred Wilson, and the Queen, Maybelline Holloway. The two young people receiving second honors, Billy Mack Read, and Vera Copeland are placing the crowns on the King and Queen.

The girls' open house was a big event with all dressed as farmers and farmerettes. Pictured are the audience, the performers and some of the guests in line for refreshments.

Club Activities

All students are encouraged to participate in special-interest clubs, officered and directed by themselves with faculty assistance. Some of the clubs that have been active this year are: The Men's Club, American Temperance Society, Teachers of Tomorrow, and the Nature Club. The Nature Club, as the highlight of their activities, spent

a week-end at Falls Creek State Park. The Business Club gave an informal banquet as their final activity.

The college Social Committee provided the year many programs of interest. Among these were: Sam Campbell, naturalist, who gave a lecture and Oscar Perrine with his beautiful pictures.

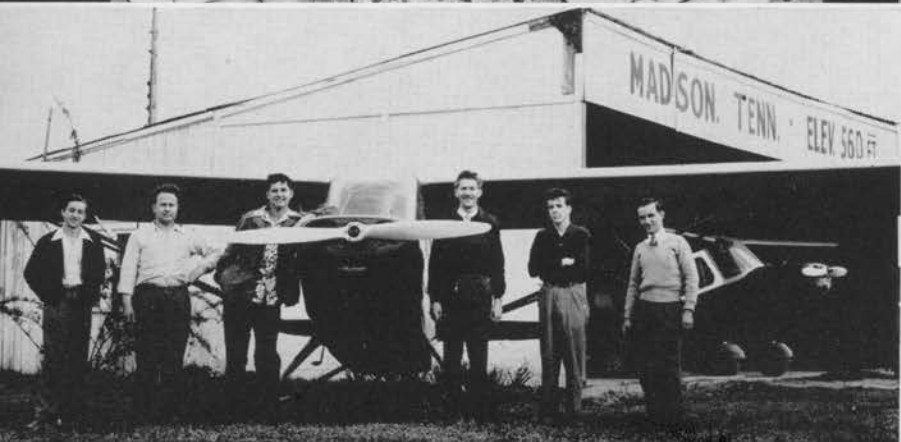

ASSOCIATED STUDENTS OF MADISON COLLEGE

This organization is for the purpose of training the young people in the development of leadership and giving them an opportunity to participate actively in the work of various college committees. The officers act as representative of the students to the faculty.

DELTA NU ZETA

The girls club is composed of the residents of Williams Hall and provides a means of social activities which are necessary in school life.

THE FLYING TEN

Members, not to exceed ten, have joint interest in a plane, and all must have their private pilots license.

FOOD SERVICE

Many students are provided work in the School Cafeteria and Sanitarium Kitchen. Pictured is our attractive dining-room which has been newly decorated this year. Sincere thanks go to those who work in this vital department.

FOOD FACTORY

The Food Factory is the largest industry on the campus and provide means of many students earning their way through school. In this factory, foods are produced that go to all 48 states and many foreign countries. It is the desire of those who head the work that they produce foods that promote abundant health.

LAUNDRY

How much work to keep clothes clean for a large student body! Our appreciation also goes to those students and workers who washed and mangled for us.

***Educational and . . .

School Home

The William's Hall girls enjoy relaxing in their newly decorated parlor.

Each week the Prayer Band leaders meet with Dean Cates to pray for the Lord's guidance in conducting their individual bands.

A typical girl's room.

Center: Dean Peck and some of his men chat informally in Argyle Weem's room.

Below: The Girls of Gotzian Home have found that growing a vegetable garden brings not only pleasure, but lots of good exercise and recreation. Pictured above we see Misses Joyce Bates and Ruth Bishop ready for work.

Bottom, Left: At last the girls of Gotzian Home are enjoying a new Coolerator. A group of student nurses are enjoying punch and fresh strawberries in their kitchenette.

Bottom, Right: Dean Copeland and two of her Senior Nurses.

Arts and Sciences

OBJECTIVES

1. To provide the student with a working knowledge of those subjects which are tools to aid him in attaining his major objective.
2. To assist the student in acquiring a substantial background of culture and social understanding.

The Pace Course has been earnestly entered into by a group of students who desire to make accounting their life work, they are gaining experience in the various departments where accounts and balance sheets predominate. The Medical Secretarial and Secretarial students are receiving first hand practice in their chosen field outside the class rooms. A B.S. is obtainable in Business Education by taking any one of these three.

The department of education and psychology is conducted for the purpose of preparing teachers in the field of elementary and secondary teacher training. Two specific needs are met in the offering of the department: a one year course provides for those who desire a short, well-organized preparation for immediate service but which will apply on a more complete preparation later; and a two-year course which may or may not be combined with work leading to a college degree.

An earnest, enthusiastic group each year enter Teacher-training recognizing the wonderful privi-

lege which God places as second to none—that of guiding and directing young people during the formative period that they may in turn be "laborers together with God" in His mighty program for the salvation of man.

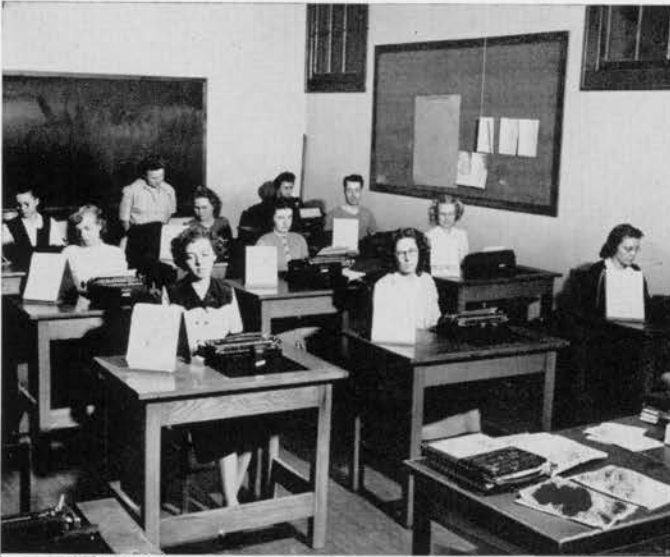

The tool subject of contact with our fellow man the English language is basic to working with and for them. The objective of this department is to so personalize instruction that each student will be directly aided in overcoming his own handicap for effective expression in both the written and oral field.

Upon the fundamentals of the Word of God is built the more detailed instruction in doctrine and the practice of Christian missionary work. The history of man is correlated with the work of God on the earth so the student is led to see in both the affairs of man and Heaven the ultimate success of the plans of the Creator—and how the student can best fit into the eternal objective. Minors are obtained in Religious Education and Social Science.

OBJECTIVES

3. To enable the student to express himself correctly and effectively in the English language
4. To prepare the student for effective religious leadership as a layman in missionary activity.

TYPING CLASS
Mrs. Oline Peck, Instructor

Arts and Sciences

OFFERINGS: VOCATIONAL COURSES

1. Pace Course in Accounting and Business Administration.
2. Secretarial Course.
3. Medical Secretarial Course.
4. Teacher Training.
5. Prenursing.

The Christian objective in education is sought from the Sciences. The student is trained to recognize the known fundamentals of life processes and structure; and how the elements of creation can be used by man in contributing to improving the conditions under which he and his fellow men live, and how these forces can be used to make easier the objective of the promulgation of the gospel. This is illustrated specifically in the course in Radio Physics as correlated with the Educational F.M. broadcasting station now in the process of construction. There is a sincere desire to aid students to find their pleasures in God's creation rather than man's devisings. The Science major will be obtainable largely by those who have completed the course in Medical Technology. Minors in Biology, Chemistry, Physics, and Mathematics may be secured by those who complete a college course in one of the obtainable major fields.

It is our firm belief that any phase of music should be pursued primarily for the service and glory of God. Music in school need not be confined in the fine arts. If music is to find the place in our lives that God intended for it, we must make it a practical thing in which all can participate in and enjoy. There will be opportunity for students not taking a major in music to ac-

tively participate in the music program of the institution by their joining in the church choir, acapella choir, band and other activities the music department may foster.

Beginning with the school year 1950-1951, there is to be offered a combined work-music curriculum in which one can learn to perform the practical duties of life and at the same time be prepared to teach and lead music in our rural units, our academies, or the community churches. This is not a specialization course but will cover all phases of music, piano, voice, chorus, band, band instruments, basic courses in harmony, music dictation, ear training and music history. This course will lead to a B.S. degree in Music Education.

The general objectives of the Art Department are to encourage creative self-expression, personal enrichment, social worth, recreational resource, vocational and therapeutic craft training; the purpose being to lead students to observe and appreciate beauty, whether in nature, in objects of daily use, or in what is usually known as "art".

To establish a group of fundamental art concepts: colon line, form, arrangement, etc., to teach the language of art, to develop the ability to apply these concepts in every day living.

OFFERINGS: MAJORS OBTAINABLE IN

- 1. Accounting and Business Administration
- 2. Lay Evangelism

A g r i c u l t u r e

Agriculture not only supplies the needed food, oil, fat, fiber, and forest products, but it is the base on which rests our entire economy. Furthermore, the study and practice of agricultural activities may be of great value physically, mentally, culturally, and spiritually. In emphasizing this fact, one writer has stated that "no line of training is of more value than agriculture," and that studies in agricultural lines should be the A, B and C of education."

The Division of Agriculture is made up of all the departments in the College devoted to the various phases of technical and practical agricultural work. It therefore uses the facilities of the College in general, such as the Science Building, with its laboratories; the other classroom buildings, including the shops of the Division of Industrial Education; the college campus—more than forty acres; and the college farm with its various departments, such as the dairy and horse barns, poultry houses, and equipment; the garden with its irrigation system and the orchard. In addition to the college farm of approximately eight hundred acres, the Ridge Top apple orchards are also available for use.

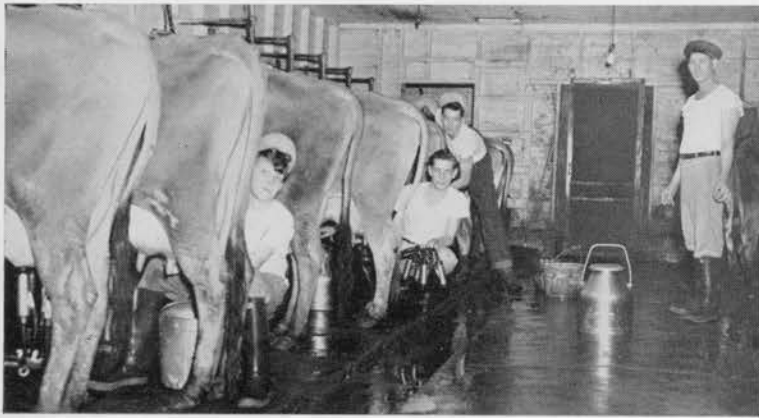

The following four curriculums are offered: a two-year curriculum in practical Agriculture; a four-year curriculum with emphasis on animal life, with a major in Animal Husbandry; a four-year curriculum with emphasis on plant life, with a major in Agronomy; a four-year curriculum in general Agriculture, with a minor in Education leading to the preparation for teaching Agriculture.

The curriculums include not only courses in technical and practical Agriculture, but the physical and biological sciences and sufficient Bible, English, Literature, History, and other supplementary courses to sustain both scientific and practical Agriculture and to develop the agricultural students to the level of education in other professions. The instruction embraces not only the principles, but also the practices of Agriculture. Provision will be made as far as possible for all students of Agriculture to work in the Division of Agriculture in its various enterprises, such as farm, dairy, poultry, fruit, garden, etc. This work will give practical experience in these various fields. The work done in the fields is closely related to that of the classroom.

Industrial Education

The Division of Industrial Education offers four-year courses leading to the Bachelor of Science degree in any one of three fields, i. e., Industrial Arts Education, Mechanical Trades Training, and Building Trades Training. The Division also offers two-year terminal curriculums in Maintenance Engineering, Auto Mechanics and Shop, and Building Trades.

It is planned that all students in the Division shall acquire sufficient knowledge in gardening and horticulture in order that they may raise their own food. Also a sufficient knowledge of health is provided so that they can give simple hydrotherapy treatments in their own homes and neighborhood. Sufficient Bible courses are offered in order to enlarge and strengthen the spiritual background.

Left, Top: Auto Mechanics Lab. Center: Tool Crib.
Bottom: Lathe and Milling Machine.

Mechanical Trades Training

The objective of this department is to train students to be self-supporting missionaries with sufficient knowledge in the mechanical trades to prepare them to do maintenance work in hospitals, schools, and mission stations. This training should prepare them to settle in communities

where they might follow a trade by which to earn a livelihood, while at the same time teaching to others the gospel of physical, mental, and spiritual development. A four-year curriculum is offered leading to the Bachelor of Science degree.

Industrial Arts Education

The objective of this department is to train students to become self-supporting missionary teachers in the field of Industrial Arts. A four-

year training is offered leading to the Bachelor of Science degree.

Building Trades Training

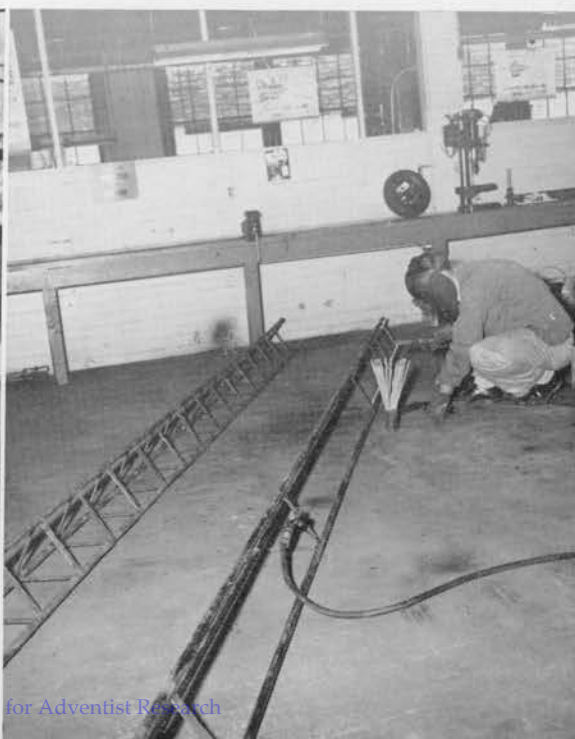

The objective of this department is to train students to be self-supporting missionaries with sufficient knowledge in the building field to make them practical builders. They should be equipped to go out and build their own homes, and to

build mission stations and churches, while at the same time teaching to others the gospel of physical, mental, and spiritual development. A four-year curriculum is offered leading to the Bachelor of Science degree.

Nutrition and Household Arts

Madison College endeavors to emphasize the importance of a four-year training program in three distinct phases of Household Arts, i. e., Food and Nutrition, Household Arts Education, and Homemaking.

The purpose of offering these courses at Madison College is to train young women for places of usefulness as dietitians, teachers of Household Arts, and true homemakers in the atmosphere of rural life, self-support, and social living.

The department offers sufficient courses to make it possible to select a major in either Nutrition or Household Arts Education leading to a B.S. Degree. The course for Homemaking has been outlined for two years. However, with other related courses offered in the College, it may become a four-year program for those who wish to complete the course.

Nutrition: A Major in Nutrition will meet the needs of those who wish to become hospital dietitians, food administrators, teachers of Nutrition, or nutritionists in public health agencies, or those who expect to make food and nutrition their field of future study. Courses are arranged to meet the requirements of the American Dietetic Association.

In counsel with those in charge, arrangements may be made to spend one quarter in a self-supporting enterprise for observation work for which a certain amount of credit may be given.

Household Arts Education: A major in Household Arts, together with educational courses, fine arts, and other cultural classes, prepares the student for the teaching of Home Economics in academies and high schools.

Homemaking: A program of study is offered for young ladies who wish to make homemaking a career. This is a cultural course which should attract many young women. It not only trains in the art and science of good housekeeping, parenthood, economics of the household, etc., but its emphasis is upon the keeping of the soul and spirit of a true home.

A Message from the Medical Director . . .

For over forty years the Madison Sanitarium and Hospital has been rendering its services with an ever-increasing efficiency. The work of this institution might easily be divided into three major phases.

First, it provides facilities for the care of the sick of this community. The larger community which this institution serves includes not only Tennessee but all of the surrounding states, and even more distant areas. Thousands of former patients remember the Madison Sanitarium and Hospital as the place where they received ministry which not only restored their physical health, but also received a vision of how they could live a fuller and more successful life.

The second phase of the work here is that of the training of young people to enter various fields of service, in the Southland and in the various parts of the United States, and in foreign fields. At the present time there are three resident physicians in training who are receiving their qualifications to go out as well-trained physicians into the communities where their services are needed. There are fifty-eight young men and women in training as professional nurses. There are many fields which the well-trained Christian nurse can enter. There is an ever-increasing demand for these young people. For the past three years Madison has offered an attendant nurses

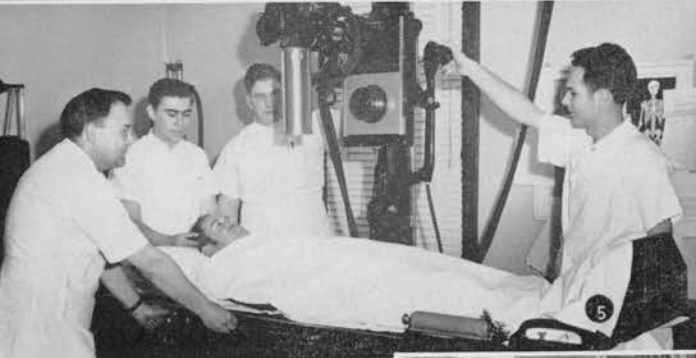

training. This provides an excellent training for those who cannot spend the full three years required for the professional nurses training. At the present time, there are fourteen young people in this course.

The course here given for laboratory technicians is recognized; and the graduates have many opportunities as soon as they have completed training. This goes also for those who are training as X-ray technicians. All graduates from the medical secretarial training course are employed by the hospital; and this is an excellent course for combining the secretarial and office nurse training. We are looking forward to adding a school for the training of anesthetists also.

The third phase of the work is that of aiding in the establishment of smaller medical centers, first by providing them with trained personnel for their staff; second, by providing them with expert consultation in the various fields of medical practice as well as the business operations of the institutions.

In all of the various activities of the institution, the fact that it is evangelical in its nature is constantly kept before the students and the workers. The fundamental principles which actuated the foundation of the institution are still the principles which are guiding its present operation in its plans for the future.

1. Cheerful, neatly-dressed students preparing to take trays to patients.
 2. Laboratory technicians carefully analyze the specimens.
 3. The Linen room is a very important part of the work.
 4. Nurses' office—surgical wing.
 5. X-Ray Technicians at work.

6. College business office.
 7. There can be no mistakes made in the R. O.
 8. Careful study in the Medical Library.
 9. Cashier's Office—Telephone Exchange.
 10. Radiologist explains an X-Ray to staff members.

Elementary School

Under the direction of Miss Catherine Shepherd, the Elementary School has had a very successful year. We wish to thank Miss Shepherd sincerely for her faithful service and deep interest in our youth.

The Madison College Pre-School, under Mrs. Gilbert Johnson's direction is a vital part of our institution. Here the small children receive care and training under experienced hands. They learn to associate with other children and early develop a spirit of unselfishness. Their diet is carefully prepared and was under the supervision of Mrs. George Thornton. Others taking charge this year were: Mrs. Frank Holland, Mrs. Catherine Evans, Mrs. Ralph Bailey and Mrs. Bernhard Jensen.

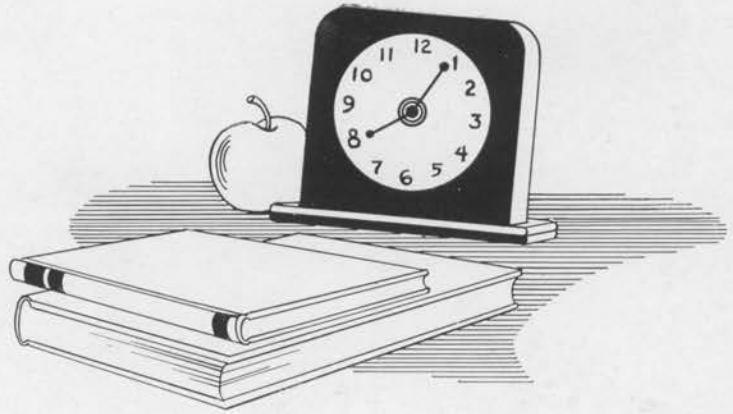

Top: The first three grades under the direction of Mrs. Glenn Byers.

Center: Grades four through six with their teacher, Miss Dorothy Matthews.

Bottom: Grades seven and eight with their teacher, Miss Arlene Smith.

Disclaimer on Physical Condition

By their very nature many older books and other text materials may not reproduce well for any number of reasons. These may include

- the binding being too tight thus impacting how well the text in the center of the page may be read,
- the text may not be totally straight,
- the printing may not be as sharp and crisp as we are used to today,
- the margins of pages may be less consistent and smaller than typical today.

This book or other text material may be subject to these or other limitations. We are sorry if the digitized result is less than excellent. We are doing the best we can, and trust you will still be able to read the text enough to aid your research. Note that the digitized items are rendered in black and white to reduce the file size. If you would like to see the full color/grayscale images, please contact the Center.
