THE 1952

CUMBERLAND

Foreword

This 1952 CUMBERLAND ECHOES comes to you with two objectives.

First, there is the usual burden of every college annual to record and picture for the teachers and students the pleasant memories of the many and varied associations and activities of this school year. As a memory book this annual will become more precious with the passing years.

Second—and in this respect this book is unique—it must faithfully present the peculiar character of Madison College and Madison Sanitarium and Hospital as a self-supporting institution for the training of men and women as self-supporting lay workers, to labor in sympathetic cooperation with the regular paid ministry in the great world work of the Remnant Church.

ND ECHOES

Our "Old Man River" — The Cumberland

Dedication

J. G. Rimmer, R.N., B.S., R.Ph., M.A.

For the past thirty-three years Professor James G. Rimmer has served on the staff of Madison College.

During this time he has served in many and various capacities, first coming to the institution as a skilled musician and mechanical engineer. He has since reached out for further knowledge, embracing the professions of nursing and pharmacy, and has done advanced work in chemistry. Surely he represents the true type of student that Madison College endeavors to train. Believing as he does in the self-supporting program, he has ignored the lure of worldly achievements to fit himself into the great lay movement.

Not only do we consider Professor Rimmer a master teacher, but we think of him as one thinks of his best friend—always ready to help the student in need, always willing to lend a helping hand when the hour seems darkest.

The staff delights in dedicating this issue of the CUMBERLAND ECHOES to our esteemed and beloved Professor James G. Rimmer.

In Memoriam

Dr. Floyd Bralliar, one of the pioneers of Madison College, has left a place which no one else can fill. He held many positions of responsibility in the Administration and Faculty of this school, and his brilliance proved itself an unlimited source of knowledge and wisdom to all those with whom he came in touch.

For many years, a familiar sight in chapel was Dr. Bralliar standing with the congregation, an open hymn book in his hand, singing with the rest, but not once glancing down to read the words, for he seemed to know the words of the hymns by memory. A sincere Christian life indicated his belief in One who was his Maker and his King.

As a naturalist he will long be remembered by the people of the Southland for his newspaper and magazine articles on gardening. His many books, such as *Elo The Eagle*, *Knowing Insects Through Stories*, and *Zip The Coon*, are filled with stories of his insect and animal friends, and have proved an inspiration to us all. The beautiful and varied shrubs, flowers, and trees make an arboretum of the campus, and stand as a memorial to the memory of the man who loved them so much.

If one word could sum up what was good and fine and challenging in so good a friend, it would be FAITHFULNESS—faithfulness in friendship, in his home, in his church, faithfulness to all his standards of conduct and honor, and magnificent faithfulness to the college he loved and to which he gave the best that was in his life.

Floyd Bralliar, Ph.D.

Muriel Oost

The campus was saddened by the news of the airplane crash on February 22, 1952, which brought to a sudden end the life of one of our last year's students, Muriel Oost. Muriel, the brother of Gerald who is now with us, was stationed at Camp Pickett, Virginia, in the service of his country. With three other soldiers, he was on his way home for a week-end leave when the tragedy occurred.

M. Bessie DeGraw, M.A.
Professor Emerita of Education

Madison College Its Heritage and Growth

Human history began in a school on the land. There the Master Teacher interpreted the miracles of creation and revealed their part in His plan. "Under changed conditions, true education still conforms to the plan of the Eden school."

UNDER DIVINE GUIDANCE, at a propitious time, Madison College was established on a farm in Middle Tennessee, by a balanced program of intellectual, physical, and spiritual activity, to prepare Christian workers to give the world a vital message. Simplest beginnings have developed into a broad industrial program. Agriculture takes the lead; food preparation is a close second; mechanical subjects, a 200-bed sanitarium and hospital, and an educational institution of senior college level—all are contributing factors in training for self-supporting missionary enterprises.

NASHVILLE AGRICULTURAL AND NORMAL INSTITUTE—its original name—by its charter reflects its objectives. By precept and example it advocates rural living. It is training teachers for the classroom, nurses, dietitians, agriculturists, clinical laboratory technicians, etc., for self-supporting activities and enterprises. For mature students, with purposes in harmony with the institution's objectives, it provides remunerative work by which they may earn school expenses.

DISTINCTIVE CHARACTERISTICS: The press has announced it to the world as "A Self-supporting College."

As "good soldiers" for the Master, students are "to learn to be content with simple food and clothing."

"Tilling of the soil and other manual work will make its students a blessing."

"Educational work at school and sanitarium go forward hand-in-hand."

"Madison's practical training fits students to go forth as self-supporting missionaries."

"Now as never before, we need to understand the true science of education."

M. Bessie DeGraw

Emulating the Madison Plan

This page pictures six of the fifty or more "units" all over the country, mostly in the South, that duplicate the general plan of Madison.

Madison is anxious to mother another fifty, and then another. Two things are needed—the school to train prospective "unit" leaders, and the students to be trained. The school is here; the students are everywhere. Task: to get the students in touch with the training school—Madison College and Sanitarium.

President Amundsen says, "It is our goal to prepare and send out another fifty teams or groups to connect with established or new self-supporting enterprises during the next five years."

Large framed picture of Ellen G. White hanging in the Faculty Room at Madison College

Mrs. White had a leading part in the founding of Madison College. It was she who selected the spot—"the beautiful farm," as she called it—upon which the school was built.

She had recently returned from a year's stay in Australia where the Avondale school had been established, under her careful guidance. And this new school in America was to be founded largely on the principles of the one in Australia.

In the early years of the school and until the time of her death, Mrs. White continued her active support of the work at Madison.

She said:

"The school at Madison not only educates in a knowledge of the Scriptures, but it gives a practical training that fits the student to go forth as a self-supporting missionary to the field to which he is called. . . . The students have been taught to raise their own crops, to build their own houses, and to care wisely for cattle and poultry. They have been learning to become self-supporting, and a training more important than this they could not receive. Thus they have obtained a valuable education for usefulness in missionary fields."

"The class of education given at the Madison school is such as will be accounted a treasure of great value by those who take up missionary work in foreign fields. If many more in other schools were receiving a similar training, we as a people would be a spectacle to the world, to angels, and to men. The message would be quickly carried to every country, and souls now in darkness would be brought to the light."

"Let us strengthen this company of educators to continue the good work in which they are engaged, and labor to encourage others to do a similar work. Then the light of truth will be carried in a simple and effective way, and a great work will be accomplished for the Master in a short time."
An Appeal for the Madison School, pp. 1-3

"The usefulness learned on the school farm is the very education that is most essential for those who go out as missionaries to many foreign fields. If this training is given with the glory of God in view, great results will be seen. No work will be more effectual than that done by those who, having obtained an education in practical life, go forth to mission fields with the message of truth, prepared to instruct as they have been instructed. The knowledge they have obtained in the tilling of the soil and other lines of manual work, and which they carry with them to their fields of labor, will make them a blessing even in heathen lands."

"It was presented to me that this was a place where an all-round education could be given advantageously to students who should come from the North and the South for instruction." **"The Madison School," Special Testimonies, Series B, No. 11, pp. 29-31**

PRESIDENT WESLEY AMUNDSEN
November, 1950 — April, 1952

My Message To You

What can one say to youth that has not already been said? Very little, I suppose. Nevertheless, even as the Lord continues to counsel and admonish us we need to do the same for one another.

What is education? What will the right kind of education do for me? In answer we would do well to contemplate the statement made by a deeply religious writer, in which she says that "True education is the development of the mental, physical and moral powers."

True education is based upon a divine philosophy, the principles of which were established by Jesus Christ, who said, "This is life eternal that they might know Thee, the only true God, and Jesus Christ,

whom thou hast sent." The right kind of education will help you to build upon this spiritual foundation. There is no other safe foundation. The end of true education is eternal life. To obtain eternal life there must be a personal relationship with God and His Son Jesus Christ. The development of our mental, physical, and spiritual faculties in accordance with divine laws will help us to attain our objectives—even life eternal.

PRESIDENT ARTHUR A. JASPERSON
April, 1952—

From Our New President

Madison College is an institution with a mission—a school that was established to do a special type of work in the training of young people. Today, enriched by a generation of experience and with the facilities provided through the years, the institution offers unusual opportunities to students desiring to train for Christian service and at the same time earn all or a major part of their school expenses by labor. A 900-acre farm, the facilities of a 200-bed medical institution, and the allied industries, provide excellent laboratory training as well as opportunities for earning college expenses.

A Few Words On Madison College by Our President Emeritus

Nearly a half century ago the need of a training school for lay workers became apparent, to train them as workers who would take their place by the side of the organized work on a self-supporting basis.

Madison College was organized on the pattern given to us by divine revelation, and it has been most successful through the years in training self-supporting workers, both for this country and for other lands.

We believe that the end will not come until a trained, self-supporting laity "unite their efforts with those of ministers and church officers." This special work Madison is endeavoring to do.

In 1946, a Commission was appointed by the General Conference committee to make a survey of Madison College and a cross section of its units. This Commission reported favorably to the General Conference committee, which approved the report of the Commission. Then in 1947, at Kansas City, Mo., a large committee composed of Conference brethren and self-supporting unit workers again studied the work of Madison. They accepted the report of the Survey Commission, approving the objectives of Madison College and Sanitarium as a training center for self-supporting lay workers.

The Lord has preserved and prospered Madison through the years, to carry out its original plan in the closing of the great gospel message. Everything in the world indicates that we are in the last movements, just before the Loud Cry. God's people too must be ready. Madison senses its present task—to train lay, self-supporting workers to unite their efforts with our paid ministry so that the end may come.

Inspired by her divine ancestry and her unique task, Madison launches out by faith into the future, to impart to as many as possible the type of training that God designed should be her special work from her very beginning. To this task she is determined to be true to the end.

Leslie V. Morris, M.A.

Biology is the study of the science of life. It is filled with intensely interesting material for those who desire to understand the physical make-up of the plant and animal kingdom and how it functions and develops.

The student becomes acquainted with the many and various forms of life, many of which he has never before been permitted to see. He thereby gains an enlarged understanding of how God is at work in His creation—in him.

He becomes increasingly conscious of how he, as an individual, can cooperate with his Maker in making and maintaining fullness of life for himself and others.

The botany class studying photosynthesis

CHEMISTRY DEPARTMENT

The Madison College Department of Chemistry maintains high professional, teaching and laboratory standards, yet it is always borne in mind that a live and practical interest should be taken by the department in the agricultural and industrial work, with the food services, and the medical work, and any other worthwhile activities.

Technical advice or assistance, therefore, are freely furnished where needed, and encouragement is given to anybody to become interested in the study of chemistry that he may be better acquainted with, and understand more of, the wonderful chemical phenomena and processes with which we are surrounded.

Professor of English

Helen C. Sandborn, B.S.

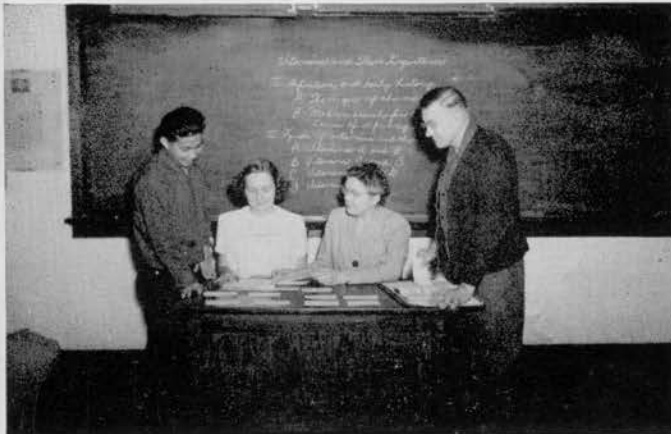

Sanford Peck, B.S.
Physics and Mathematics

To be able to use words effectively in speaking and writing is an accomplishment worth striving for. We are told that "he who knows how to use the English language fluently and correctly can exert a far greater influence than one who is unable to express his thoughts readily and clearly." To discover in the treasures of literature the good, the true, the beautiful is to make life richer and fuller. These treasures are open to all who avail themselves of the opportunity to study literature. The student who approaches the study of English with these ends in view will find his courses the most practical in the curriculum.

"God wove a web of loveliness,
Of clouds and stars and birds,
But made not anything at all
So beautiful as words."

Physics is the science of the five senses. It is the study of the laws operating in the world that God made for us—the science of the forces that make the birds fly, that cause the wind to blow, the rain to fall, that make the battleship float. It is the science of the physical world around us, with an understanding of the smallest atomic particle to the largest mountain. And in it all is revealed that "the laws of nature are the laws of God."

Patricia Templeton Ostrander, B.A.
Voice

The chimes of vespers, the celestial harmonies of the Sabbath choir, the majestic strains of the church organ, and glad voices in hymn-praise lift our hearts to the realm of the Eternal. The symphonic melodies projected by an ensemble of strings inspire our esthetic natures; the stirring sounds of brilliant trumpets and the rhythmic rolls of drums deepen our breathing—then we thank God for His creative power of beauty, love and music. "The object of all music should be the glory of God," said Johann Sebastian Bach.

You can't draw a straight line? That's not important. Less than one per-cent of us become artists, but all of us become art consumers. And Art Education's chief concern is not one's drawing ability but the development of discriminating judgment and esthetic appreciation..

Such subjects as design and color are taught, that the student may dress in good taste, furnish his home attractively, and generally maintain a higher esthetic standard of living..

Art today is recognized as an important phase of everyday life, more than when it was confined within the galleries.

Kathryn K. Bertram, Art

Religious Education and Social Sciences Departments

Felix A. Lorenz, M.A., B.D.
Professor of Religious Education

Walter H. Siemsen, M.A.
Professor of Social Sciences

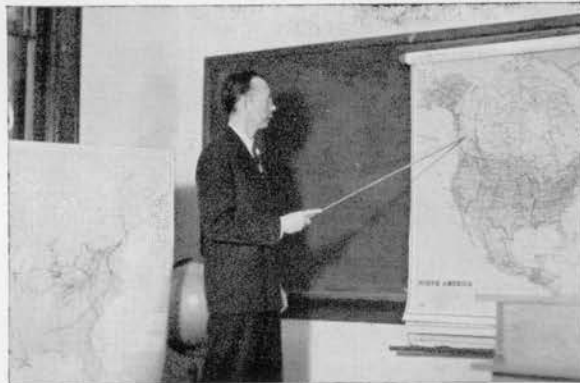

Mrs. J. A. Tucker, B.S.

Wesley Amundsen, B.S.

"If all would make the Bible their study, we should see a people further developed, capable of thinking more deeply, and showing a greater degree of intelligence, than the most earnest efforts in studying merely the sciences and histories of the world could make them. The Bible gives the true seeker an advanced mental discipline, and he comes from contemplation of divine things with his faculties enriched; self is humbled, while God and His revealed truth are exalted." **Fundamentals of Christian Education**

The Social Sciences—history, geography, sociology, economics—seek to acquaint the student with the forces that underly the society in which he lives. Of the Social Sciences, history is the more significant, for it reveals to the careful and reverent student the hand of God in "all the play and counter-play of human interests and power and passions."

Apiary

Never has there been a time when the import of impending circumstances has indicated more forcefully the decentralization of populations toward country places. Madison College has long understood the developing situation and has, through her agricultural work, encouraged the anchoring to the soil of all branches, or new institutions patterned after her, by locating on farms.

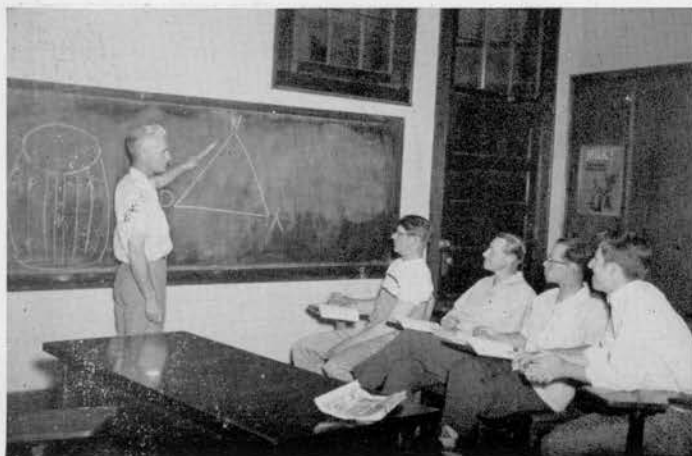

The distress of people and nations makes it even more important that we brighten the lamps that shine upon the God-given purpose of educating for country living. Your Madison College staff of agricultural workers is of good courage and is rapidly shaping its physical plant, teaching facilities, qualifications, and general morale to meet the demands of the time in which we live.

You may be assured that, if your mind and heart have longed for the day when you could move to and hold your own in a country place, we are prepared to be the stepping stone for you from the city to the country. It would gratify us to serve you to this end.

Secretarial

It is a great satisfaction to prepare for a profession in which there is a great need in every field. Business managers, accountants, and secretaries are in demand everywhere. Do you like to work with people? Do you enjoy being where the wheels go 'round, and perhaps help to keep them turning smoothly? Do come to Madison College and enroll in the Business or Secretarial courses. You may want to specialize in Medical Secretarial work. You may prefer to serve in some other special field—Editorial, Art, Educational, or Business. There is no limit to the interests that may open before you, once you have finished a basic course.

Educational Psychology and Teacher Training

J. A. Tucker, M.A.
Chairman, Division of Educational
Psychology and Teacher Training

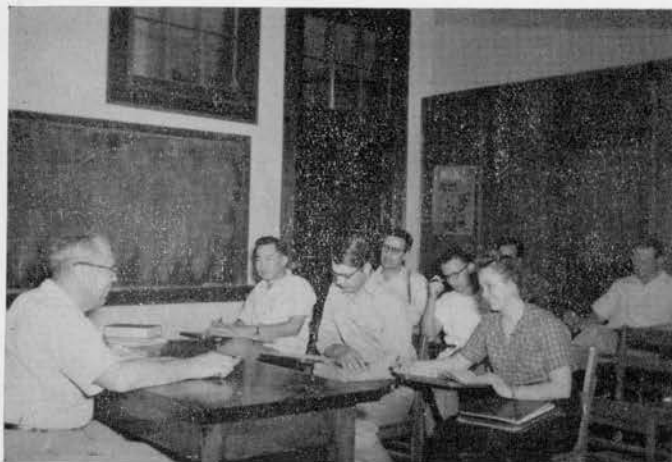

Mary L. VanSlyke, M.A.
Elementary Education

The two phases of the work of Madison College, as the name Nashville Agricultural and Normal Institute indicates, placed emphasis upon teacher training. Throughout the years this phase of work at Madison has been carried on. The emphasis has been on training teachers for rural life and education.

This division of the institution has operated, until now, as a department, but from now on it will be given divisional status. The training of teachers at the elementary, intermediate, and high school levels will be fostered.

Particular emphasis is placed on teacher training in the fields of Agriculture, Home Economics, Industrial Arts, Health, and Secretarial Science.

Art and Design

"My father worketh hitherto and I work." When men and women are rightly occupied their pleasure grows out of their work as the color-petal out of the flower. True culture, fragrant spirits, and intelligent teamwork germinate and spring forth at Madison College from the Household Arts Division.

Instructing, cultivating, polishing, refining, mellowing, inspiring future housewives and teachers in the atmosphere of sunny Tennessee's fresh air, work and play, study, wholesome food, and merry hearts are the methods of the Household Arts staff.

Happy homes and helping others to make happy homes, where angels love to linger, become for students and teachers alike not only a grand investment but also bring the highest rate of interest.

"This way of life"—What an Art!

School of Nursing

Nursing today is as truly a calling as it was in the days when Florence Nightingale held her lamp high and its light was seen all over the world. Then the call to be of service and give comfort and aid to one's fellow men was not accompanied by the knowledge and medical aid that the present nurse has at her finger tips; but these modern aids have not dimmed the spirit, the devotion, and the desire to serve, but have rather given a glow that shines brighter and brighter as each Christian nurse gives her life in purity, sincerity, and love, for the physical and spiritual welfare of those she serves.

"She is not afraid of the lowliest service, and she does not fail in the highest."

STANDING:

School of Anesthesia

The School of Anesthesia was organized in the summer of 1950. It is fully accredited by the American Association of Nurse Anesthetists, and graduates are eligible to take qualifying examinations for entrance into that association.

Arrangements have been made for affiliation with Vanderbilt University Hospital, Florida Sanitarium and Hospital, Hinsdale Sanitarium and Hospital, Illinois Masonic Hospital in Chicago, and Charity Hospital in Shreveport, Louisiana.

Students are taught all types of anesthesia in common usage today and are expected to become proficient in giving endotracheal anesthesia and in giving and managing spinal anesthesia.

Medical Technology

The college offers a four-year clinical laboratory course leading to a Bachelor of Science degree in Medical Technology.

The first two years are spent in basic prerequisite work. Then follow six quarters of actual practice in laboratory procedure and techniques and in prescribed class-room work.

On completion of this course, students are eligible to take the examination for American Medical Technologists.

Cyrus E. Kendall, M.D., D.N.B., and Donald Welch, B.S., M.T., A.S.C.P.

X-ray Technique

The X-ray department is an important unit of the hospital. It is the gateway through which most of the pathology of the institution passes. Much depends on the clarity of the films and the experience and training of the man who reads the films.

We are conducting a class in X-ray technique. It is a one-year course, and is accredited with the Committee on Education of the American Medical Association. The students are required to have finished high school and one year of college before entrance. We admit one or two students every quarter.

The department is happy to announce the recent acquisition of a new rotating anode tube and other pieces of equipment to enhance its value to the institution.

George Thorton, B.S., and Gilbert Johnson, M.D., D.A.B.R.

Industrial Education

William Sandborn, M.A.
Chairman, Division of Industrial
Education

The objective of this department is to train students to be self-supporting missionaries with sufficient knowledge in the industrial field to prepare them for institutional maintenance, as teachers in the field of Industrial Arts, or as practical builders. They should be equipped to go out and build their own homes, and to build mission stations, schools, hospitals, and churches, while at the same time teaching others the gospel of physical, mental, and spiritual development.

Student-Teacher Council

The need for better understanding between the faculty and the student body is apparent in any large school. To meet this need at Madison College is the aim of the Student-Teacher Council.

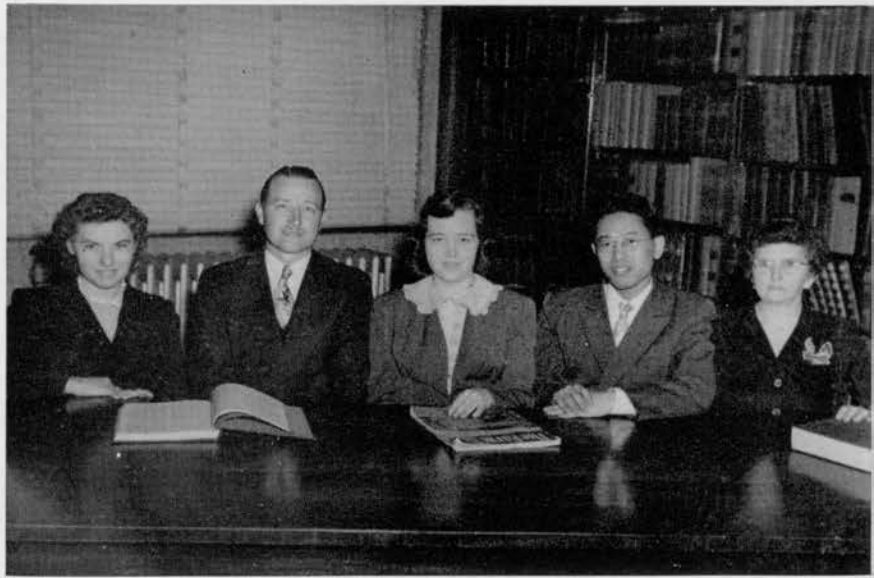

Inter-Collegiate Workshop

A 1951-1952 Inter-Collegiate Workshop was held at Union College, Lincoln, Nebraska, October 26-29. Delegates from Madison College were Argyle Weemes, Sue Townsend, Aline Wallis, Marilyn Jensen, Pat Mitzelfelt, and Don Welch.

Who's Who

On the basis of scholarship and ability to lead out in student affairs, these students—Sue Weemes, Glen Schaeffer, Marilyn Jensen, Charles Wang, and Edna Atkin Pepper—have been listed in *Who's Who Among Students in American Universities and Colleges*.

Government Committee

There is an old proverb that states that "Obedience to law is liberty." Those students who find it necessary to appear before this student-teacher committee soon learn the great truth behind this quotation.

Social Committee

Life is made up of social contacts, and students find that life at Madison College is no exception to this rule. It is the responsibility of this student-teacher committee to plan and arrange the many programs, parties, picnics, and banquets that make a school year complete.

VOL. II, NO. 3

MADISON COLLEGE, TENNESSEE

DECEMBER 17, 1951

Madison Host to M. V. Rally

The M. V. Society of Madison College was host to the youth of the Nashville Area gateway, Bowling Green College, Olin College, and the University of Tennessee. The rally was held in the auditorium of Madison College, and was a fitting high day to close the Week of Prayer.

MARILYN JENSEN
Editor-in-chief

Special following by the Academy, a quartette, and Street church, a more quartette; Madison College, a mixed quartette, a trumpet trio, a brass trio, a baritone solo, and a ladies' quartette.

An overflow audience packed the auditorium and filled the vestry and the porches. It is estimated that 600 attended most of the meetings.

To the students of Madison College, the rally was a fitting high day to close the Week of Prayer.

Delta Nu Zeta

Some of the most remembered events in a girl's life at Madison College are those centered around the organization in Williams Hall known as Delta Nu Zeta. Many varied activities such as. . . Thanksgiving banquet . . . Christmas party. . . friendship sisters . . . marshmallow roast. . . hayrides. . . promote a better understanding among the girls of Williams Hall and aid in the development of a higher Christian culture.

Some of the officers of Delta Nu Zeta

The first formal occasion of the year was the Thanksgiving Banquet presented by Delta Nu Zeta.

Wasiota

The memory of the Christian fellowship enjoyed this year by young men at Madison College will grow dearer to them as the years pass. Often they will look back upon the quiet worship periods. . . fervent prayer bands. . . quest speakers. . . spirited club meetings. . . banquet. . . spaghetti supper. . . volleyball games. . . and see that, after all, it added just that spice of life, along with the more solid experiences, that makes the year worth while.

Religious Activities

From the early morning worship to the last evening prayer, life at Madison College is marked by religious activities. Founded on purposes which are of divine origin, Madison College aims to lead youth to a fuller life of service in the steps of their Master.

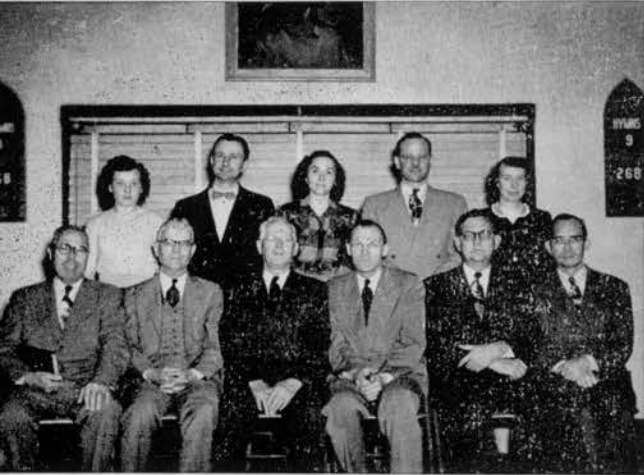

Who can forget:

- The quiet Vesper services on Friday night?
- The study of the lesson in Sabbath School?
- The rousing Missionary Volunteer programs?
- The Weeks of Prayer when all were brought closer to the Master?
- The weekly prayer bands?
- The inspiring church services?

Does it not all lead one to say with the psalmist of old: "One thing have I desired of the Lord, that will I seek after; that I may dwell in the house of the Lord, and to inquire in His Temple. For a day in thy courts is better than a thousand. I had rather be a doorkeeper in the house of my God, than to dwell in the tents of wickedness."? Psalms 27:4, 84:10

Medical Cadet Corps

In harmony with General Conference action, Madison College has re-activated its Medical Cadet training. This training provides basic and technical military medical knowledge, not only in the classroom but also in actual field experience, thus preparing young men to render more acceptable service to their country in a time of local or national emergency.

Membership in the corps is restricted to physically able college men and to academy juniors and seniors or to those who have passed their seventeenth birthday. The uniform and corps insignia are required of all those registering for the corps.

This course carries three quarter hours of college credit, covering approximately 108 clock hours of instruction.

Red Cross First Aid

The value of First Aid training is most apparent in time of tragedy when it enables one to be of service to others in their greatest need.

Under the leadership of such capable men as Professors Rimmer, Oakes, Zeigler, and Medford, courses in Standard, Advanced, and Instructors' First Aid are made available to students of Madison College four quarters a year.

A Message From The Medical Director

J. C. Gant, M.D., F.A.C.P.

We are living in a world of rapid change. When one purchases equipment today, one of the first things the accountants must determine is how rapidly the value should be depreciated. In former years this could be determined quite largely by a knowledge of its durability and the amount of use it would have. Now, however, durability is a far less important factor than obsolescence. Our equipment does not wear out now—it just becomes obsolete. In the purchasing of a motor car the first question one asks is not, "What is the condition of the engine or the upholstery?" but rather, "What year was it made?" This largely determines its value.

The same is true of techniques and methods. In carrying on our work we must keep abreast of the times. We no longer rely on horse-drawn vehicles or the sailing vessel to transport our messengers and our truth! We are dealing with a message that literally has wings. Not only does it have wings, but it is traveling with the speed of light.

In no field has advancement been more rapid than in the field of medicine. There was a time when a person with little training and with improvised equipment could accomplish a great service. This is no longer acceptable, especially where better facilities and skill are available. Today and tomorrow demand that we have well-trained and technically-trained personnel if we are to maintain our leadership in the care of the sick.

We are admonished to establish many small medical institutions. Small does not mean inferior. To train workers to do superior work in small institutions is the goal of Madison College and Madison Sanitarium and Hospital. The opportunity for combining theoretical study and practical work is unequalled. The operation of small institutions requires superior quality. It requires men and women who are capable of receiving training in more than one technical field. We must have those who have multiple talents. The field is wide open for such people.

Not only do we need a high degree of technical training, but such persons must have the qualifications for meeting the public and properly representing the Lord's Work. In taking up work of this kind, one immediately becomes a leader in his community and can exercise a broad influence in the vicinity in which he is located. It is difficult to evaluate the influence of such workers.

In this work of ministry our workers find that the doors of the community are wide open, and they have no difficulty in obtaining an audience. The self-supporting work is coming into its own, and without doubt is destined to exercise a powerful influence in the finishing of the work. It offers a challenge to our young people and demands the best that is in them!

Madison Sanitarium and Hospital, through the years, has exerted a great influence over the lives of thousands of people in a large community. It is dedicated to the purpose of continuing and expanding its work. But a work that is equally important is that of training young people to go out into other communities and carry on a similar work. Whatever one's field of interest may be, if it pertains to hospital or sanitarium work, he will find that Madison is able to give him the training necessary to do effective work.

Madison College Elementary School

For the purpose of training children in Christian principles, a six grade elementary school is operated on the campus of Madison College.

The value of Christian education is perhaps never fully appreciated until a child reaches maturity and, by his life, shows that he has not departed from the sound principles instilled in his heart and mind while but a mere youngster in the elementary grades.

This school is one of the liveliest spots on the campus. Seventy children sing in the junior choir and twenty-five play in the junior band.

The children are not only music-minded but also highly missionary-minded. During Ingathering they nearly doubled their goal. They are very active in J. M. V. activities, and a great interest is shown in the progressive class work among students of all ages. It is because of the cooperation of parents and teachers that such results are achieved.

Directors of the Pre-School

Pre-School

The best statement of the aim and work of the pre-school is found in the words of Jesus, "Suffer little children to come unto me and forbid them not, for of such is the kingdom of heaven." The children learn to see the working of their Heavenly Father in the things of nature. They learn to play together and work together at projects suited to their age and experience. The pre-school is a wonderful help in the care of young children whose mothers have to work, and for children who have no brothers and sisters or playmates. Important lessons in social adjustment are learned naturally and early. Music is an important feature of the department.

The Food Factory

College business office

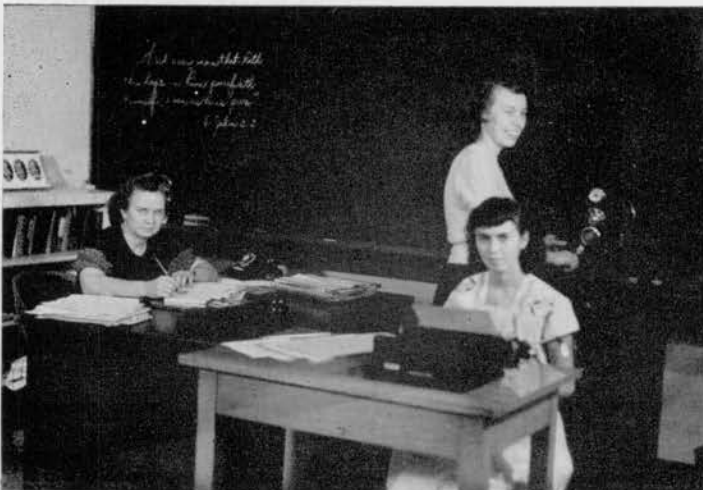

This is the place, so it is said,
Where students who are in the red
Must do some tall explaining.

And here the "purchasing" is done;
See how they smile—it must be fun
To spend, and still keep gaining.

Commissary office

Commercial department office

When tests and term exams appear
These girls must print and guard them here,
Great secrecy maintaining.

The secrets of one's inner heart
And whether one is dumb or smart,
This office is compiling.

Personnel office

Registrar's office

And here those awful grades are kept;
No penitence can intercept
Their everlasting filing.

Switchboard

You wait—and wait—and wait for her,
And then, "The line is busy, Sir."
Then try to just keep smiling.

Here you earn your way—

More work, less money—

*Trip to Mammoth Cave
Sponsored by The Cumberland Echoes Staff*

This trip was the reward given to those students who got eight subscriptions for the 1952 CUMBERLAND ECHOES. The lantern-carrying party wound through miles of tunnels and chambers and took a boat ride on Echo River. Lunch was carried into the cave and served in an underground dining room.

Maybe you would like to work
where the wheels go 'round, right
in the center of campus activity . . .

Or perhaps you have a particular
printing job for particular printers.

Either way, YOU'LL be interested in

Choose NURSING as a Career

SIDE VIEW SHOWING SURGICAL AND OBSTETRICAL WING

Madison Sanitarium and Hospital, 200-bed capacity, is the training ground for nurses, both men and women. Three years of professional training makes one eligible to the State's certificate of the Registered Nurse (R.N.). One year of college work beyond this entitles one to the additional degree of B.S.

The objective of this combined college and medical institution training is to educate nurses' supervisors, treatment-room workers, X-ray, and laboratory technicians, with a Christian background to meet a pressing need in the self-supporting, medical-evangelistic program fostered by Madison.

Although carrying a very full program during the three years of professional training, nurses seldom fail to earn their expenses, and often considerably more.

Other of the student group besides nurses in training also find remunerative employment in the medical division of the institution. They, too, are earning while they learn.

Train to meet life's problems and be of service to many, at Madison College and Madison Sanitarium and Hospital, located on the bend of the Cumberland River in beautiful Middle Tennessee.

Write Director, School of Nursing, Madison Sanitarium and Hospital, Madison College, Tennessee.

Riverside Sanitarium & Hospital

800 YOUNG'S LANE
NASHVILLE 7, TENNESSEE
TELEPHONE 2-1671

How Is Your HEALTH?

The Riverside Sanitarium and Hospital offers a unique service to health seekers. Beautiful, spacious grounds and surroundings; comfortable, well-furnished rooms; well-balanced meals; conscientious and well-trained personnel; solarium and lounge for patients; and up-to-date equipment for care of all ordinary diseases and ailments make Riverside ideal for recuperation.

The hospital has modern facilities for diagnosis and treatment of all surgical, medical, maternity, and pediatric conditions.

The sanitarium provides the Battle Creek treatments consisting of physiotherapy, scientific diet and rest.

The Riverside Sanitarium and Hospital is approved by the American Medical Association, and is a member of the American Hospital Association and Blue Cross Plan of hospitalization. No mental or contagious diseases are treated.

ESTABLISHED—1947.

Disclaimer on Physical Condition

By their very nature many older books and other text materials may not reproduce well for any number of reasons. These may include

- the binding being too tight thus impacting how well the text in the center of the page may be read,
- the text may not be totally straight,
- the printing may not be as sharp and crisp as we are used to today,
- the margins of pages may be less consistent and smaller than typical today.

This book or other text material may be subject to these or other limitations. We are sorry if the digitized result is less than excellent. We are doing the best we can, and trust you will still be able to read the text enough to aid your research. Note that the digitized items are rendered in black and white to reduce the file size. If you would like to see the full color/grayscale images, please contact the Center.
