

# THE BEACON

VOL. II No. I

MADISON COLLEGE, TENN.

Nov. 5, 1951

## Campus Undergoes Plastic Surgery

A transformation was wrought in one single day on the campus of Madison College not only in the appearance of certain buildings and areas, but also in the external appearance of various students. One hundred gallons of paint were applied to the four houses between Williams Hall and Scott Corner, Nutrition Laboratory, the Oakes home, over one hundred students, and a good representation of the faculty members.

To set off the gleaming coats of paint, the ground around the houses also received a face-lifting. Lawns were mowed, weeds cut, yards raked, and shrubbery clipped, greatly improving the general appearance of the campus.

Another project was the completion of the recreation area. The shelter was finished except for the roof, the tables were painted, and the weeds and grass cut. A fence was erected, enclosing the recreation area, limiting its use to the human race. (Hitherto the area had been overrun by horses and cattle.)

Further improvement may be seen in the newly spread gravel on the roads

in the trailer court. The occupants of the court will be grateful for accessibility to their homes when those winter rains begin.

This clean-up day program was sponsored by the Student-Teacher Council. The members of the planning committee were Brothers Clough, Sandborn, Medford, and Louie Dickman. Hats off to these who planned this improvement day, to the school for furnishing the supplies, to the faculty for their admirable guidance, and to the students for their enthusiastic response.

We realize the work involved in mapping out this program and appreciate the fine job done by this committee. Without their earnest efforts, this campus facelifting could not have been effected.

But the wisdom that is from above is first pure, then peaceable, gentle, and is easy to be entreated, full of mercy and good fruits, without partiality and without hypocrisy.

James 3:17

## A Challenge

It is the plan of the Agriculture Division to carry out all of the activities which are understood to be a part of a self-supporting educational institution. Some of these are the providing of training experience for the youth as well as the adult, exhibition of practices and achievements in keeping with the Divine pattern, and the provision of material goods as products of the enterprises.

In the training of young men for agriculture work, it is recognized that it is necessary to keep abreast of the progress made by the agriculture world and at the same time keep a firm hold upon the ideals for which this school was established.

With the present standards of living among the rank and file of American people, it is not likely that many of our young people will be attracted to an agricultural education in which they must undergo severe working conditions, and at the same time endure an extremely low standard of living.

The term "small farm" is attractive to many people of limited means for the reason that such farms seem to be within the range of their purchasing abilities. While a "small farm" may cost little, it is to be recognized that it will pay little under ordinary farming. Therefore it will be the burden of this division to train the youth to think of establishing farms of adequate size and diversity of enterprises to assure a reasonable gross income.

The question arises how to secure a farm of adequate size. Let it be kept in mind that we have no other aim than to provide training for individuals who are definitely interested in fitting into the agricultural phase of self-supporting missionary units. This being true, we believe that where several families are banded together for such an undertaking it will be possible to secure large enough farms to meet all their needs.

If the Agriculture Division at Madison College fails to accomplish these objectives, it has failed in the purpose for which it was established.

## Let's Do Our Best

The woes and trials of registration are now over and classes are well under way. At least the teachers are in full swing with their assignments. But what about you, student of Madison College? Are you taking those assignments in your stride or are you one of those moaning about "piles of work" to do? If you may be found in this group, perhaps a little diligence in bettering your study habits would be to your advantage.

When you study, **CONCENTRATE!** Practice increasing the amount you can comprehend in a given length of time, whether it is reading, memorizing, or just plain **Hard Study**.

When your teachers assign a number of pages to be read, first ascertain how the material is to be handled. If it is to be studied carefully, that will of course take some bit of time, but if it may be read rapidly, do just that. Read as rapidly as possible, ever striving to increase your speed as well as comprehension; you will be amazed to see how rapidly those mountainous assignments can dwindle.

Some students insist that they can study much better while listening to the radio or the melodious voices of their roommates. Most students, however, agree that the most intense concentration is achieved where peace and quiet reign supreme. For this reason, whether we do or do not study during study period, we should maintain a quiet hour for those who need and desire to study.

Throughout each study period, as in every other moment, there stands One at your side, ready to help you solve that problem, tackle that essay, and read that assignment. You have only to call upon Him to receive understanding in your time of need. Every study period will go more swiftly and prove more profitable if you first invite His Presence there.

Students of Madison College, let us each one study to show himself "approved unto God, a workman that needeth not to be ashamed..."

m. j. j.

### Delta Nu Zeta

The new look has come to Williams Hall—only this time it's not longer, it's just prettier. And what's more, it's not the girls' skirts—it's the wall. Attractive paint has been put on in whites, blues, yellows, and pinks, and the appearance of the building is a living testimony to the fact that some paint brushes, not to mention students, got a real workout this summer.

A second brightening factor at Williams Hall is the presence of the new dean, Mrs. Hazel Rowland, who came to Madison from North Carolina, where she and her late husband were the owners of Pine Cove Sanitarium in the Smoky Mountains. With her are her daughter, Mrs. Lloyd Bailey, whose husband is a former student of Madison, and Mrs. Bailey's little daughter, Barbara. Mrs. Bailey is taking the nurses' course and is now residing at Gotzian Home, while four-year-old Barbara is staying with her grandmother, and is the youngest resident of Williams Hall.

While the Amundsens are away on their vacation, Mrs. W. H. Wineland is acting as matron.

Mrs. Lorenz spent two weeks in Wil-

liams Hall while Mrs. Rowland took a two-week vacation in North Carolina.

Delta Nu Zeta is very sorry to lose its new president, Aline Wallis. Aline was forced to give up the presidency because of previously accepted responsibilities, which have filled her extra-curricular time. Harriet Lowry, former vice-president, succeeds Aline. Sue Townsend will also give up her office of secretary for similar reasons.

Elder Lorenz spoke at Williams Hall worship, Sunday, October 7. Before starting his speech proper, which was a constructive talk on general demeanor of dormitory residents, he made a much-needed suggestion for a new chair arrangement in the worship room. This suggestion was gratefully accepted and carried out, resulting in maximum comfort, appearance, and convenience. The chairs are now in a semi-circular order, facing the northeast corner, allowing the speaker a position other than that of being pushed against the north wall.

Girls in the cafeteria are plaguing the corners and cracks with their dust-cloths. The kitchen crew, including Opal Lowry, Luz Journet, Rosa Martinez, Nydia Reyes, Elsie Brown, Rachel

Quevedo, Mrs. Peacock, Evelyn Moore, Helen Pearson, Bobbie Moore, Antonio Rivera, Tatsuya Akebi, and of course Mrs. Amundsen, has launched a clean-up spree with the ardent help of Mrs. Midgett, a new addition to the cafeteria from Old Hickory. Also, Mrs. Amundsen's office is in line for a face-lifting, including new draperies and linoleum.

Williams Hall girls are in the midst of money-making activities to help with the purchase of a new refrigerator for their kitchenette. The program Saturday night, including movies and popcorn and candy sales, netted \$65.00 for the fund.

Mrs. Rowland and Mrs. Franz recently make a trip to Nashville to purchase a davenport, two chairs, and new drapes for the first floor lobby.

Rumors are flying that Delta Nu Zeta may be hostess to a fall banquet around Thanksgiving time. Also there are indications that the boys will have to do the asking this year.

The girls are becoming better acquainted, and this year's activities are well under way, all of which gives reason to believe that this year will be another good one for Williams Hall.

### Class Tours Publishing Houses

Six news writing students, with their teacher, Miss Elizabeth Cowdrick, spent a profitable afternoon on Tuesday, October 23, touring first the plant of the Southern Publishing Association and then the home of the *Nashville Banner*.

The class toured the Southern Publishing Association with Miss Mary Moore, whose long experience there enabled her to make each step in the production of magazines and books understandable and interesting. There were brief glimpses into the editorial rooms, explanations of the linotype and monotype processes, galleys of type and pages already made up waiting to be taken to the presses. An interesting sidelight, an illustration of the method of color printing, showed why books cost money. Busy presses were rolling out the new Ingathering magazines and books at a rapid rate. The tour ended in the bindery and the photographic library.

The *Nashville Banner*, one of Nashville's two dailies, has a circulation of nearly a million and puts out five editions daily. Some interesting features of the tour through the editorial rooms included watching the teletype machines type the latest news, visiting the local Associated Press office, and seeing the next day's editorial cartoon in its very early stage. Lastly the group went to the new building which houses the new million-dollar electronically controlled presses, which were then pouring out the day's sports edition at the rate of a thousand a minute.

## Nursing Highlights

The Madison College School of Nursing began the new year on September 17 with 31 freshman nurses, of whom 9 were men. These students represent 18 states, Puerto Rico, Hawaii, and Canada:

Nell Arishirro, Hawaii  
 John Aldrich, Kansas  
 Virginia Bailey, Alabama  
 Mary Lou Bedford, Oklahoma  
 Albert Berger, Texas  
 Mrs. Leta Brandemihl, Wisconsin  
 Mr. William Brandemihl, Montana  
 Bernadine Burson, Kansas  
 Shirley Chastain, Colorado  
 Betty Clark, Minnesota  
 Gladys Duran, New Mexico  
 Godfrey Duran, New Mexico  
 Dahan Edwards, Oklahoma  
 Agnes Effenberg, California  
 Nannie Hambrick, Georgia  
 Delaiah Jordan, Colorado  
 Don Jennings, Montana  
 Rosa Martinez, Puerto Rico  
 Velma Midghall, Kansas  
 Bill Park, Washington  
 Esther Radinz, Wisconsin  
 Shirley Reed, Canada  
 Amos Self, Tennessee  
 Myrle Tabler, Nebraska  
 Jeannette Vernon, Tennessee  
 Isabelle Voorhies, Indiana  
 Mary Belle Wentworth, Kansas  
 Alice Yun, Hawaii  
 Arnold Riley, Wisconsin  
 Keo Weegar, South Dakota  
 Charles Smith, North Carolina

These bring the nursing school enrollment to a total of 71 students.

Twenty-one students were graduated on September 5, all of whom received calls and are now employed. Two of this class are enrolled in the Anesthesia course offered here in the hospital, and several have joined the Madison staff and are giving excellent service to the institution.

The following are now on the Madison staff: Mrs. Phyllis Riggenbach and Mrs. Lois Cheevers on Surgical Wing, Mrs. Mary Wentworth in O. B., James Hancock and Charles Van Dusen in General, Larry Cheevers relieving where needed.

Construction of the Formula Laboratory is well under way, and according to present plans, it will be in operation around the first of November. Mrs. Menton Medford, dietitian, will have charge of this department.

Central Supply has been moved to its new location next to Surgery and is under the supervision of Mrs. Jean Lowder. The extra space and the new equipment make for more efficient service in this department.

Miss Edith Munn has accepted a call to be superintendent of nurses at Fountain Head Sanitarium, Fountain Head, Tennessee. She has worked untiringly for the institution during the past five years and has indeed been a friend to the Sanitarium family. Her

many friends will miss her steady influence, and their thoughts and prayers go with her as she takes up her labors there.

Madison welcomes Mrs. Tralece Burch and Miss Arva Quance into the Sanitarium family. Mrs. Burch will take up her duties as supervisor in North Hall. She relieves Mrs. Roland Parker, who with her husband will connect with the Scott Sanitarium in Reeves, Georgia. Miss Quance will be assistant supervisor in the operating room. She comes from the Porter Sanitarium and Hospital in Denver, Colorado.

Mr. David Killion and Miss Alice Weaver have enrolled for the course in Anesthesia. Mr. Killion is a recent graduate from the Union College School of Nursing. Miss Weaver is also a graduate from the Union College School of Nursing, but comes from the Porter Sanitarium and Hospital. Another new recruit is Darrell Jones, from the 1951 class in nursing. The rest of the class is comprised of graduates from this school of nursing.

All departments have gotten off to a good start this year, and everyone feels that with the Lord's help this will be one of Madison's greatest years for service in the cause of the Lord.

## Sanitarium News

Doctors George and Margaret Horsley and Master Wilson Horsley welcome a new arrival to their family, a seven-pound baby boy, Brooks Alfred, born October 9, 1951.

Charles Wang and Mervin Riggenbach are the new recruits in the Clinical Laboratory. "Washing dishes" is their main job now, but soon they will be in the swing of lab work.

Miss Katina Poulos is now in O.B., taking the responsibility of seeing that everything moves off smoothly nights.

The medical secretaries, Mrs. Patterson, Aline Wallis, and Sylvia Maltby, have a pleasant new office across from the pharmacy in which to type their reports.

## Did You Know?

Louie Dickman, an industrial education major from California, received an indefinite deferment from military service.

Dan Doherty, a graduate of the Attendant Nurses' Course, and family have left for Wisconsin. Mr. Doherty will be employed in a sanitarium in Wisconsin.

Lee Eytcheson and wife have departed for Lansing, Michigan. Mr. Eytcheson was compelled to leave because of health conditions. He will be employed by a stainless steel company as a district sales manager.

Mr. and Mrs. Glen Schaeffer are the proud parents of a boy weighing eight pounds. His name is William Allen.

Mr. and Mrs. Zeke Allen have left the campus recently and are now residing in Madison. Mr. and Mrs. Allen

are both employed in the Gepford Furniture Factory in Nashville. Zeke works in the factory while his wife works as an office clerk.

Mr. and Mrs. Dean Edwards spent a very pleasant vacation in Greenville, South Carolina, visiting Mrs. Edwards' parents.

A number of newlyweds have joined Madison's family of married students. Among these are:

Geraldne Hamilton	Louie Dickman
Rachel Campbell	Carl's Quevel
Joyce Bates	Edward Barnside
Mary Morsette	James B. Collins
Helen Martin	George Webster
Verda Jeffrey	Wilbur Field
Doris Haight	Bill Grover

Organization of the Married Students' Club is eagerly awaited.

Madison is sorry to hear of the misfortune of one of its students, Robert Ostrander. He is confined to the Veterans' Hospital in Murfreesboro.

Mr. and Mrs. Dale Kendall and family spent an enjoyable vacation in Battle Creek, Michigan.

## Self-Supporting Workers Convene

Madison College was host to over one hundred visitors, many of whom were former students of the institution, over the week end of October 4-7. The occasion was the Forty-second Annual Convention of the Self-supporting Workers of the South, which brought together as a homecoming, delegates from affiliated schools and medical centers operated in rural districts of Tennessee and neighboring states, together with a group of friends of this work who came from more distant places.

An outstanding hour of the convention was devoted to a report of the agricultural achievements of various farms in the group of rural centers. The growing of hard wheat, the home grinding of the flour, and the making of whole wheat loaf were demonstrated by a representative from the Little Creek School and Sanitarium. Fletcher's dairy contributes to the maintenance and publicity work of the Asheville Agricultural School and Mountain Sanitarium in North Carolina. Pine Forest School and Sanitarium feeds itself from the garden. Flower growing is a leading activity of the rural unit on Sand Mountain in northern Alabama.

Out-of-the-City and On-to-the-Land, a project for every rural unit as it works with its nearby city, was the ringing message of Dr. E. A. Sutherland, founder and for forty years president of the Madison Institution.

These active workers turned their faces homeward where they are educating students in an all-round practical program to meet the strenuous times of the present and to demonstrate still further a way of living for the more troublous times ahead.
