CHILDREN OF MADISON COME HOME

by Bob Sutherland

We are extending a special invitation to all those who grew up on the Madison campus over the years. Sarah Ann (Goodge McNeilus), Helen Bush Boer, and Lyle Marie (Wallace) Stockdale have all expressed the idea that it would be great to have such a gathering at Homecoming this year. If you know the addresses of some of your childhood friends here at Madison write to them and suggest they come too. Please-do come. It is always good to meet again.

HOMEcoming 1992

We are pleased to announce the classes to be honored at the 1992 Madison College Homecoming June 19-21 are: 1924, 1925, 1934, 1935, 1944, 1945, 1954, 1955, 1964, and 1965.

Please arrive Friday in time to register at the Alumni Office located in the Heritage House, beside where the Druillard Library used to be. See the map for specific directions.

Sabbath there will be a potluck, for lunch and supper. Please send \$5 per person for each meal.

Meetings will begin Friday evening and continue through Sunday. It is also important that you stay

TCMC

by Jim Culpepper

For 14 straight months, through Dec. 1991, Tennessee Christian Medical Center has made a profit. This is a new day for TCMC, as most of the years in recent history have been loss, or minimum profit years. It is anticipated that the profit for 1991 will exceed two million dollars. For the first time in the recent history of AHS/Sunbelt, the profit from all hospitals (other than Florida Hospital) has equaled the profit at Florida Hospital.

Having a profitable year at TCMC has enabled the medical center to do some things they could not do previously. A new medical park, the Cumberland Bend Medical Park, is being developed. This is an eight-acre parcel of the campus between the old Parkview Building and Larkin Springs Road. The first two-story 10,000 square foot office building was just completed, and several have already moved in.

A new office building is being built by several physicians and a dentist at the intersection of Old Hickory Boulevard and Larkin Springs Road. This should open by summer.

Street lighting has been installed along Larkin Springs Road from Old Hickory Boulevard to the hospital entrance.

All these changes mean more physicians on or near the campus or, assuring more patients for the medical center. At this time the future success of TCMC looks good.

Dr. E.A. Sutherland and his Guardian Angel

by Ira Gish, Ph.D.

Near the same time that Dr. Sutherland opened the Madison Sanitarium, the Hicks family opened some treatment rooms in Portland, TN. They were not Adventists.

After some years, Mrs. Hicks became seriously ill. Her doctor came to her bedroom and said he could do no more for her.

A short time later, a man entered her bedroom and asked about her health. He said he was a doctor at the Madison Sanitarium. When she finished telling him of her serious condition, he asked concerning her faith in God, her belief in prayer, and her spiritual life. "I am not a member of any church," she replied. She did, however, answer in a solid "yes" to all his questions of belief in her spiritual life. He then told her to come to Madison and she would get well. With that he quietly left

COMING EVENTS

MADISON COLLEGE
HOMEcoming
JUNE 19-21, 1992

ASI
AUG. 5-8, 1992
PALM SPRINGS, CA

HOMEcoming 1992, cont.

Saturday night for the business meeting.

Area motels: Madison Motel, 625 Gallatin Rd. PH: 1-800-227-8760. Friendship Inn Motel, 118 Emmett Ave. PH: 1-615-865-2323. KOA Kampground, see map back page.

Dr. E.A.'s Angel Cont the room.

A few minutes after he left, the thought came to her, "What is his name? How will I know how to find him at Madison?"

Her husband and nephew sat across the hall reading. She called to her husband, "What was the name of that doctor who was just here?"

"No doctor has been here," he said. "Oh, yes there was," she said. Then she told him of the incident. He said, "Mother, I sat right here across from you. I have seen no one, neither have I heard anyone talking to you. The only outside door to this room is right here in front of me--no one has entered this house. You must have a fever--your mind is not clear. Let me take your temperature." It was normal.

He then asked his nephew, "Did you see a man enter this room?" "I did not," replied the youth. "Did you hear a man tell Mother to go to Madison Sanitarium?" "I did, and he told her she would get well, I thought it was her doctor talking." "Yet you never saw anyone?" "I did not. "Something is wrong here," said Mr. Hicks. The three looked at each other in silence. Finally Mr. Hicks said, "We will go to the Sanitarium at once."

After she was placed in a room in the Sanitarium, the nurse called Dr. Sutherland.

He came at once. When he entered the room, Mrs. Hicks exclaimed, "Hello, doctor, you told me to come here and that I would get well. Here I am."

Dr. Sutherland said, "I have not been off this place all week. You did not see me. I have never been to

MADISON CAMPUS

Things are happening on the Madison campus. Buildings are going up and buildings are coming down. You will be surprised at how open the campus looks since some of the old buildings have come down. The campus is looking beautiful.

The newest building to go up, which Jim Culpepper told us about in his column, looks like an antebellum home. It is really lovely and something that we as Madison alumni can be proud of.

We are happy to have Madison Academy here on the Madison campus. As you may know, Madison Academy has been here almost from the inception of Madison College. They have built a beautiful, \$1,000,000 building, which sets near where Williams Hall used to be. So between the hospital, TCMC, and the academy we can, even if it is with a little sorrow because we cannot revive the past, be glad that there is still a Madison campus to come back to for our Homecoming each year. We can also be glad that the hospital and academy are doing so well, and we can know in our hearts that Madison College, our Alma Mater started it all, and if it had not been for Madison College, TCMC nor Madison Academy would be here today.

Something very interesting was unearthed as the library was coming down. Under the floor near the south entrance, under what was called the "English" classroom, was found a well (see the picture taken by Bernard Bowen). The well was concreted up in the shape of a bee hive, with a large steel drum in the mouth. Does anyone know anything about a well being in that area of the campus in the early 1930's? Please let us know.

Bernard Bowen, Jim Culpepper, and Dewey Luzader took care of getting the paintings by Katherine Bertram. They are in good condition and on 4 X 8 formica sheets. They are now in the Heritage House.

During Homecoming, Bernard will have on display one of the blocks from the library made here on campus and one of the 3/4" steel rods used for re-enforcing. That size rod is not seen very often in buildings built today.

Dr. E. A.'s Angel Cont. Portland."

"I saw you just yesterday," she said, "and you told me to come to Madison Sanitarium and I would get well.

After you left, you must have seen my doctor and he told you I am dying, so now you are trying to go back on your word."

Dr. Sutherland asked Mr. Hicks if he had seen or heard him. He had not.

He then turned to the nephew, "Did you see me?" "I did not," replied the nephew. "Did you hear me?" "I did. I heard you tell her to come to Madison Sanitarium and she would get well." "Yet you never saw me enter or leave!" "I did not," replied the lad. A silence fell over the group.

At last Dr. Sutherland said, "Lady, you did not see me yesterday. I was not there at any time. The person you saw was my guardian Angel. He can look and talk just like me. If he said you will get well, you will."

"Oh, no, doctor. I'm a poor woman, and an Angel would not come to me." Dr. Sutherland then related some stories from the Bible where Angels had visited poor people, and Mrs. Hicks became quiet.

In 3 days after treatment, Mrs. Hicks was well and went home. The Hicks family became members of the Adventist church. In a year's time 30 friends of the family also joined the church.

NEWS NOTE

"Miss Mable" Towery who has served as the Executive Secretary of the Madison College Alumni Association for 30 years, moved to the Imperial Manor Convalescent Ctr. in February. She has now moved to a private home. Her address is: PO

Continued page 3 col.

Box 6303, Madison, TN 37116. Her phone number is 615/859-3766. Please send only personal mail to the above address.

You will be able to see "Miss Mable" at Homecoming at which time she will be honored for her 30 years of service to the alumni association, and for keeping the association together after the demise of Madison College.

CHRISTMAS LETTERS--1991

We thank those of you who have shared your Christmas letters from your friends with the readers of the SURVEY. Please understand that this year, etc. means the year 1991. Please send a Christmas letter to your alumni office in 1992 so your classmates can learn about you and your family. If you have any letters from classmates please send them now and we can put them in the next SURVEY. The readers of the SURVEY would like to hear.

Vera Bergman, Anes., '67
Orem, UT

It really feels like winter. It is 1 p.m. and the temperature is only 28. The snow is on the ground but the sun is shining.

Carolyn and Dale Lodge stopped by. It was a delight to have them. Wouldn't mind if some of the rest of you came too, would be happy to have you.

In the spring I planted seeds again for people at the Hospital as well as for myself.

In Sept. at the State Fair, I was only able to enter one flower show, and I had to take a vacation to do that. I received 1 Honorable Mention, 2 2nd-place ribbons, 8 1st-place ribbons, 3 special award ribbons, and a Best of Show Trophy.

The best part of this whole year took place on Sept. 30, my last day of work. We had been one person

short all year and during Desert Storm two people short, so we had the socks worked off us. I'd say retirement is great. Hope you have had a good year.

Beth Carter, BSN'61
Collegedale, TN

This is the first year since Belize that 2 Christmases have found us in the same place.

We spent January in Canada for the birth of our 6th grandchild, Keith & Kristis' first child. This was also Keiths' last year of medical school in Calgary, Alberta.

Greg & Andi, along with their children, are still at Dayton, OH. They work for Kettering hospital as nurses. We were delighted to spend 3 weeks with Greg's oldest son, Shane, at the Maranatha project in Farmington, NM at LaVida Indian Mission.

Rita, Eddie, & daughter Heather still live in Selmer, TN. C.D., my husband, helped them with an addition to their trailer before he launched into a full-scale operation of clearing and landscaping a place for us at Cumberland Heights, TN (about 22 miles east of Monteagle, I 24). We now have a place to call home and to invite people, if we ever stop work long enough to go there ourselves.

In March, C.D. went with Bob Zollinger and Laurelbrook students to lay the foundation for the project at LaVida Navaho Mission. From there we went to ASI in Denver, CO and then spent 1 week in Jefferson Nat'l forest, camping and climbing rocks and basking in rest. Then back to work at Hazard for the next 18 weeks. After a family Christmas we go back to Mexico & Belize for 6 weeks, then back to work.

C.D. spent November doing a projects with Bob Zollinger in the Dominican Republic, Laurelbrook, Little Creek, Harbert Hills, Fletcher & Advent Boys' Ranch. All these mission adventures have been wonderful, and the Lord really blessed. I ended up as assistant cook for 100 people at Lavida and C.D.

became "Dr. Carter" for the Dominican project, as well as project director. We never know how we will end up or what the Lord has in store for us until we get to these projects, but they are always a great blessing for those who are willing to be seed of Him.

Dorothy Civalago
Asheville, NC

We have moved from our home in Harlan, KY to Asheville, NC.

In the past year, Peter and Steve have both completed their Residency Program. Peter is working in Anesthesiology in Cullman, AL and Steve is set up in Family Practice in Rochester Hills, MI. Carol is expecting a little one in June. John is still with J.C. Penney Co. in Corbin, KY as merchandise manager.

John Crowder, M.D.
Laguna Beach, CA

1991 was a year in which we began putting our lives back together after a tumultuous 1989-90.

I returned to work part-time practicing psychiatry in Irvine, CA in July, after recovering from liver transplant surgery. Currently I am dealing with a minor episode of rejection, but otherwise the new liver is working well.

My wife, Anna Mae, has been a real trouper through all of this. When we came back to California, she resumed her full-time position as an ophthalmologist for CIGNA Healthplan in Irvine. She had her hands full with me, but took on the chairmanship of the board of our church school and became choir director as well. She is a patient mother and seems to get by with very little sleep.

Our daughter Kirstin is 13 years old and in the 8th grade. She scores in the 98th percentile on national achievement tests. This year she has been on the Laguna Beach Swim Team and is active in children's theater production and musical workshop.

Our son, Gregory, just turned 6

and is in the 1st grade. He is so curious and enthusiastic about everything. Lately he has been discovering games, paint programs, and other software for the Macintosh. He is probably more computer literate than his parents!

This year the family traveled together to Kauai where we have a "home away from home" and to Washington, DC with grandparents Lindegren, for medical meetings and sightseeing.

We enjoy hearing from you during the year and would welcome a visit. The "Crowder Inn" always has room for one more.

Clyde & Eulalia Franz
Candler, NC

We were in Florida during the first 3-1/2 months of the year. During this time Clyde was hospitalized 3 times, and finally had a splenectomy. Eulalia is still partially paralyzed as a result of her stroke but slowly improves.

This and other factors convinced us that it was time to sell Bluebird Hill with its 4 acres of lawn and 18 acres of woods. We moved into a condominium at Pisgah Estates in Candler, NC in November.

Sue and Wellsley are still at Frederick, MD. Trina is a junior at Southern College. Chad is at SVA in Virginia. Our son Chuck has retired from his orthodontia practice and lives at Oxnard, CA. We ask your prayers for his wife Ginie, who is fighting cancer. Their 3 sons are well. We are happy to be near Richard's brother and his wife Norma.

Doris Lee, N'51
Altamonte Springs, FL

Last year at this time Roland, my husband, was recuperating from a major heart attack and angioplasty. In January he underwent major surgery for cancer of the prostate, but it was contained and removed. Roland retired in May after 38 years with the Filbert Corp. I am still working full time. September found

us traveling to New England. Pictures do not do justice to the beauty of New England in the fall. We came back through Tennessee to my class reunion.

Thanks to the hospitality of Stanley & Mary Charles (Scott) Jones, the nursing class, after 40 years, was able to get together near Little Creek Academy. Eleven of the original 21 class members were there, along with their spouses. We have been invited to come again next year the first week-end of October.

My daughter Judy and husband Loren had a boy in June. They also have a daughter age 2. Between Roland and me, we have 11 grandchildren.

We enjoy visiting with "winter guests," especially my brother, Harold with his wife Rosemary Iles. Also Marvella & Mike Tachenko.

If you are ever this way give us a call--the door is always open.

Jack Northcutt, Anes., '57
Altamonte Springs, FL

David married Denise June 23, which is Lois's mother's birthday. This expanded our family by 2--Denise has a 6 yr. old son.

The swimming pool (put in last year) is still a popular place with young and old, and was used 10 of the 12 first months we had it.

Lois' sister Gini was down from Calgary, Alberta for 2 weeks in Nov.

I am enjoying work and keeping healthy. I love to garden.

Heather and Joe and daughters are doing well. Heather has been doing some writing for children for the General Conference. Joe is still working with SunBelt health systems.

David and Denise both work with Florida Hospital, and children Kellie and Douglas are also in Kindergarten.

Lois' mom Ann Kimball is keeping well at 88, and is off to the Far East with a tour group.

Helen Raddmann, BS'34
Maywood, NJ

For me, 1991 has been a good year. Among the fun times was my vacation to Fire Island, a long strip of land, perhaps 1/2 mile wide, off the coast of Long Island. The only cars permitted are those of police and community services, so everyone has a child's express wagon to pull shopping items and beach gear. Huckleberries grow all over. The beach is beautiful, and deer roam the streets as freely as domestic pets.

In the fall of 1990 I had started a sign language class, and since I was a beginner in a group that had some experience, I was naturally the class dunce. Most of them dropped out during the year, so I finished fairly well. Don't ask what my purpose is--I haven't any, except the fascination of doing it, but I suppose that in itself is a purpose.

I still work as the church secretary, mostly making the weekly bulletins. I also found another source of income as a volunteer test subject for a local research laboratory. It's easy and pays well. I can do it only a few months more before I exceed their age limit.

Vernon & Esther Schroeder
Beaver Dam, KY

I remember with pleasure the time spent at Madison. Something at that time was put into my soul that will remain through eternity. The years spent at Madison on the work force are remembered with pleasure.

My wife Esther sends greetings. Her first husband who passed away was also a Madison student like me, so it was natural for us to get together.

Karen Shrader, Anes.'75
Centerville, OH

One of the things we have been trying to do this past year is master the art of wallpapering. We have enlarged the existing area of flowers and herbs. Actually the herbs were re-planted many times due to nightly raids of spoiled 'coons. Speaking

of raccoons, we watched yet another generation grow up on birdseed.

Being able to travel and "bird" together was a highlight of our year. We visited 23 states in 1991. We also fit in trips to Canada and Venezuela, all in the pursuit of birds, and we spotted 500 species this year.

We ran into Paul Wentland in Colorado, who had come all the way from the North Pole (AK, that is) to attend the same Wilderness Medicine Conference.

We are both finding our jobs at Kettering Medical Center to be challenging and fun, and we are thankful to be able to work in such a pleasant environment.

We look forward every year to the news that all those Christmas cards and letters bring.

Bernice Schueler, S'31-34
Madison, TN

We're in Michigan for Thanksgiving, but "it's beginning to look a lot like Christmas!"

After returning to Tennessee, we'll begin preparations for our trip to Phoenix for Christmas with our 3 children, their spouses, and 4 or more of our grandchildren. One of the highlights of our visit there last year was an exciting hot-air balloon ride over the city on New Year's Day.

This has been a busy year. In May we came to Michigan, and in 5 weeks' time we attended two weddings, (grandniece Jill and granddaughter Lynda), a reunion with several of my cousins, the funeral of a cousin, a Father's Day picnic, granddaughter Cara's birthday bash, camping and boat trip in Saugatuck with my brother and his wife, my 80th birthday celebration, etc.

We had several trips with the TCMC Volunteer Auxiliary "Trippers." My sister Glenna joined us on the trip to Memphis for the Catherine the Great Russian exhibit and to Charleston, SC, Covington, KY and Cincinnati, OH--where we also had a ride on the Ohio River. In

October we went to Nassau. We claimed that trip as a premature celebration for our 60th wedding anniversary coming up in July. We came back to Florida and stayed in Orlando near Disneyland for the weekend. We saw 18 former friends from Madison. On Sunday we went to Epcot Center and thoroughly enjoyed it.

Gary and I are enjoying our work as volunteers at TCMC--this makes 10 years there for us. We are in very good health and I had my 2nd cataract surgery.

Lois (Almskog) Walper, BS'60
Ft. Myers, FL

We passed quickly through Madison last August, but didn't see anyone. (Wish you had come by the Heritage House.)

We have been in our new house a little over a year. You'd think we'd know for sure just where everything is and maybe why we chose to keep it all these years, but that's not the case.

There are always so many "volunteer" jobs that come along, and then there's the Sunday organ church job that George has. For our own church, George is choir director, organist every other week, is school board chairman, and is on the church board, and I am assistant-head deaconess.

The community in which we live is secured by a guarded system, and George is in charge of security for the community and is a board member. I was asked to publish a quarterly newsletter for the community.

We saw our children 3 times during the year. In August, we had a family reunion and Bob and Irene Walper came from Louisville, KY with their grandson Jeff.

Our daughter Eileen and her husband Tom have 2 children, Nikki and David.

The newest addition to our family is the first "great-grandson," Hagan Anstis, who is the grandson of our son Leslie and his wife Ann who live in Tennessee.

**James, BSN'35 &
Freda, N'48 Zeigler**
Collegedale, TN

We appreciate all the wonderful friends who remembered us during our 60th anniversary celebration. We chose Fall Creek Falls in which to spend our 60th honeymoon vacation. Our thoughts turned to the many times we brought the Nature Club students from Madison College to the Falls.

We look forward to enjoying Christmas with our children and Ruby and Henry Burchard and 2 of their 3 sons and families.

We find great security and comfort in our dear Savior.

ALUMNI NEWS

John R. Aitken, S'54-55
Otto, NC

Enclosed please find my subscription for the MADISON SURVEY. I enjoy catching up on the news of fellow Madisonites and classmates.

Irene Ams, N'36
Orlando, FL

I have been thankful that I've had the privilege of attending Madison College and graduated from nurses course in 1936. I retired in 1974. I have been volunteering one day a week in the hospital pharmacy at Florida Hospital as an auxillian, and enjoying it very much.

Daisy Emma Arnold, N'45
Millington, MI

I received the welcome letter and the nice 5 copies of the MADISON SURVEY.

Yes, I am very much alive! I was born in 1918. I had my first two years of nurses training at the Orlando San in Florida. I affiliated at Children's Hospital in Washington D.C., then returned to my home in Michigan. After circumstances permitted, I resumed and completed my nurses training at Madison. Our class took our State Boards at

Vanderbilt University in Nashville. I worked under special contract upon completion of my training in supervising and treating the patients in West Hall, Dittis and Hankins Cottages, in the field of psychiatry under Dr. Joe Sutherland and Dr. Harry Witztum.

I left Madison on completion of my contract to return to Michigan. I needed to be by my mother who was in poor health.

My nursing after leaving Madison was always in outside institutions due to circumstance and locations. I worked in California for 3 years but have practiced my profession mostly in Michigan while devoting other time to the home of my parents and our Michigan churches.

Just now, I am working with the Michigan conference of SDA's in the interest of health and nutrition.

Through state and union opposition, my father and I had to sell out our Grand Traverse Vegetable Gardens, including the tourists' store and our Dynamic Tool and Dye Co. I would not allow state controls or the union to enter our gates. I had to leave in a hurry and the real estate co. brought some people out to see the place, who seemed to be interested in the vegetation and orchards and business, but it turned out that they were not interested. They let the place lie dormant.

I have written to the Department of Justice and others to reclaim my prior ownership. We have a great need for our own canning plants and a sanitarium out in the country in Michigan. Sister White implores us in the Testimonies to have more sanitariums in the countries--these have been converted into hospitals in so many of our SDA institutions.

Williamsburg, which is in East Grand Traverse region, has many things to offer for a good sanitarium. Please read the Testimonies, Vol. 7, pages 76-89. This instruction by Ellen White is important and urgent.

**Carl Eddy, BSN'50 and
Grace (Bartlett) Baker, S'50**
Arcadia, FL

Happy New Year to all of you!

Our time at Madison College has many happy memories--folks worked hard there, but all taken into consideration, it was a nice place to work hard. We feel grieved that so many changes came after the death of dear Dr. E.A. Sutherland--he was a builder. Others that followed seemed to be wreckers. They call that progress?

We look forward to the SURVEY--it is appreciated. I enjoy rereading the back issues.

Alice (Lindsey) Brewer, MCA

I attended Madison 1931-32, and graduated from the 12th grade when the school was named NANI. I lived upstairs in the Assembly Hall.

In 1937 I married Raymond E. Brewer. We came back to Madison in 1952 and stayed until 1955. Raymond managed the school garage while taking some classes in accounting. Our daughter Frances graduated from the 8th grade and finished 2 years of academy at Madison. We then went to Orlando, where she graduated from Forest Lake Academy in 1957.

My husband passed away this past July. He was ill for only a year after his problem was diagnosed. I thank the Lord that he didn't have the pain or the ill effects of chemo that most people have.

A friend of ours gave us a subscription to the SURVEY. I enjoy it and have seen names of some of the students that were at Madison when I was in the 1930's.

Alice Cross, N'36
Waco, TX

I received your letter for dues and SURVEY, and because of it I am responding immediately. Surely I am grateful for having attended Madison, then called NANI. Had it

not been for this institute, I could never have attended elsewhere. Being able, to work my way through school I was given opportunities to exercise my experience in many different ways. I often wish those days could be re-lived, but, thank the dear Lord, soon those days will even be better.

Please find my donation enclosed. Hope this will help. I wish to say--he who gives while he lives also knows where it goes. After reading Matthew 25, I wish to be ready for come what may--as spiritual preparedness cannot be shared.

Howard F. Davidson, N'37
Ukiah, CA

My wife Ella Hamberger died after a short illness of Alzheimer's disease. We were married in 1985, and enjoyed 4 years of happiness together. She died suddenly.

I have not been well of late, but am feeling some better. For some time I did not answer any letters, etc. I am still living in my own home and able to care for myself, but not much else. I enjoy receiving the SURVEY.

**Agnes (Effenberg)
Dorosh, N'54**
Wilbur, OR

The SURVEY is greatly enjoyed and appreciated. I always look forward to reading its pages. Madison College was a wonderful college with many happy memories. Thank you for your hard work in keeping the SURVEY going. Enclosed is my check to help.

**Vanessa (Standish)
Ford, MCA'37**
Loma Linda, CA

I would feel very sorry to miss receiving the SURVEY, so here is my change of address. My husband Elden Ford and I are moving back to live in the USA after completing 48 years of service in Central America for our great SDA work. We have served in districts, mission offices, and academies in various countries

3rd Annual

HERBAL MEDICINE SEMINAR

June 20-21, 1992

AT MADISON CAMPUS SDA CHURCH

FREE

Please Register Now!

The seminar this year will feature professional medical missionaries with a long track record of successfully supporting themselves and the work while being engaged full time as Lay Medical Missionaries. They are top experts in the field and we are honored to have them come to Madison and speak.

Herbal ID

On June 20 Sabbath afternoon at 2pm Dr. Calvin Dence will conduct a Nature Walk featuring wild herb identification and a display of live potted organically grown herbs which may be purchased after the seminar is over on Sunday.

Later you have a choice of 3 different 1 hr. video's to watch. They are:

100 useful wild herbs

Trees, shrubs, nuts, berries

Culinary herbs and flowers

If you cannot wait until June 20th you may order any of the above 60 min. videos for \$24.95 or all 3 of them for \$69.95 including shipping.

Home Made

Herbal Medicine

Dr. Ron Arnold will demonstrate how to make herbal salves, tinctures, poultices, pills, capsules, etc.

If you can't wait for this we have a video correspondence course for \$99 to show you how to do this. Or you may want to order "From the Shepherd's Purse for \$24.95, which is the main textbook for this course. It is the single best book we know of for this subject.

Lay Television

Lay television evangelism is utilizing the right arm of the message reaching entire communities with the 8 laws of health and herbal medicine education. See and hear the latest developments.

Country Life

Andre and Heather Wilson have been running a vegetarian restaurant and lifestyle counseling successfully for over 10 years. Learn and be inspired by their success in the true historical Madison spirit.

Home

Sanitariums

Carla and Mamon Wilson will tell how they have conducted a small country retreat sanitarium successfully for over 10 years. Come talk to their students and be inspired by their use of the 8 laws of health and herbs.

Area motels: Madison Motel, 625 Gallatin Rd. PH: 1-800-227-8760. Madison Square Motel, 118 Emmett Ave. PH: 1-800-821-4148. There are 2 KOA Kampgrounds.

HERBAL Agriculture

Herbal medicine agriculture can be used as a cash crop for self-supporting schools. Learn the how, when and where of this thriving business from a top professional. Free lecture on Sunday. Workshop on Monday--See Monday writeup.

MONDAY, JUNE 22, Workshop

Herbal Agriculture

Learn from Red Alderman, who is successfully raising and marketing herbs to pharmaceutical companies and the health food industry for US and foreign markets.

Each student will get a feasibility study of his resources. Soil, labor, finances, climate, market demand, government regulations, etc. will all be considered. Cost: \$100 if you pre-register. \$125 at the door. Follow up telephone consultation service is included as part of this class.

REGISTRATION

Seminar Registration \$10 donation, to help with expenses. If you do not have \$10 come anyway, but please register now so that we can plan, this will help us to plan and better serve you.

Monday workshop fee \$104. Make checks out to Madison Medical Missionary, PO Box 5843, Madison, TN 37116

Attendance History!

In 1990 we prepared for 50 people, 120 came.

In 1991 over 200 people came from Florida, Michigan, New York, Texas, etc. ??1992?? 300+ ?

Please register now so we can prepare to serve you better.

Please photo copy & distribute to church bulletins, publications, bulletin boards, etc.

HAPPY HERBALING!

from

IF YOU WOULD LIKE TO SUBSCRIBE TO THIS HEALTH SHEET
FOR 6 MONTHS, SEND \$5.

MAN'S WEEDS GOD'S MEDICINE

HOW GINGER FIGHTS VERTIGO

by Charles Morton

(Motion Sickness)

Scientific evidence is once again validating ancient herbal folklore. This time it's ginger's time to astound the scientists.

Ginger was tested alongside Dramamine and placebos to see if there was anything to ginger's reputation to combat vertigo (dizziness). Laboratory tests proved that ginger did indeed deserve its reputation. It controls vomiting by 72%. Overall, ginger was proven to be 38% protective against the symptoms of seasickness.

Danish scientists say they do not know how the ginger works but that it takes effect within 25 minutes and lasts for 4 hours.

The common dosage is 1/2 tsp dried ginger 1/2 hr. before encountering the motion. If you use fresh ginger use 1 tsp. The most convenient way to take ginger is to take 2 or 3 capsules, 500 MG each. You can find ginger at your health food store.

A 12 oz. can of gingerale contains enough ginger to be more effective than 50 to 100 MG of Dramamine.

Curbing vertigo is not ginger's only pharmacological asset. Animal testing shows that it lowers cholesterol, is an antibiotic and is a strong antioxidant.

In certain medical circles ginger is best recognized as a blood thinner. It reduces the tendency of blood cells to stick together. The effect is

Cont. Page 1, bottom of Col. 2.

VARICOSE VEINS

Concentrated white oak bark has been used for varicose veins with good results. To concentrate, strain the finished tea and then simmer down the liquid to half its original amount. Dip flannel into the concentrate, wrap around the bad area, cover with plastic, and leave on all night. Do this 6 days a week with one day of rest, repeating until relief has been obtained.

Another way which has been found to give relief is to dip gauze into the concentrated tea, coat the entire area, and allow this to dry. It is recommended to apply 10 or 12 coats in this way and then to lightly bandage the leg allowing the oak residue to be absorbed into the skin. To clean and feed the venous structure internally as well as externally, drink 1/4 cup of oak bark tea in 3/4 cup water, filtered water is preferred, may be used 3-4 times a day. If possible, take one capsule of cayenne with each cup of tea.

Ginger

Cont. from Page 1 Col. 1.

attributed to ginerol a ginger compound chemically structured like aspirin, a well known anti-clotting agent. Ginger does all its magic without the harmful side effects of aspirin, which causes 1 tsp of blood to hemorrhage from the stomach for each tablet ingested.

Several studies confirmed ginger's ability to control blood cell stickiness and clumping. Some scientists are even suggesting using ginger for this problem rather than drugs because of their dangerous side effects.

THE GREAT WAX COVERUP

Many consumers seeking to improve the quality of their diets by eating more fresh fruits and vegetables are not aware that many fresh produce items are coated with a layer of wax.

Waxes, like benomyl, are often mixed with pesticides. Benomyl is a fungicide classified as a human carcinogen. Other materials used for waxing fruits and vegetables include shellac, carnauba, polyethylene and paraffin-type waxes which are mixed with water and emulsifying agents.

Wax is also used to glaze hard candies, to coat jelly beans, and as a component of chewing gum base. A number of the fungicides that are added to waxes have been shown to cause increased risk of some diseases, including cancer. Fungicides are added to waxes to prevent mold, rot, and other deterioration from occurring. Some of the fungicides approved by the FDA for post-harvest use include benomyl which is classified by the EPA as a possible human carcinogen, and has been shown to increase skull and central nervous system anomalies in the offspring of rats given an oral dose during the first 20 days of pregnancy.

Other fungicides are Ortho-phenylphenol which has been shown to suppress the immune system of exposed rodents, sodium ortho-phenyl phenate, which is classified by the International Agency for Research on Cancer as a possible human carcinogen. It has been demonstrated to produce urinary bladder cancer in rats and in male mice to produce liver cancer. Also many waxes may contain animal-products.

of this Union. It is hard to leave our work and friends here.

Nellie Green, BSN'56
Longwood, FL

Thanks for the reminder to renew my subscription to the SURVEY. I enjoy it and read it from cover to cover as soon as possible after it arrives. I can hardly wait to read about the whereabouts and activities of Madisonites whom I met at Madison College.

I graduated from nursing with a BS in 1956. I taught there a few years later as clinical instructor for the graduates of 1964.

After teaching at Madison College, I went to Cave Springs Home-School for handicapped youth as a co-founder with Julia Grow, a classmate and president from the beginning in 1956 until 1990 when she retired in California. I volunteered my services until 1977, when I retired to Florida. I am living with a classmate, Elinor Davis.

I admire all of you who have given time and talents to the Madison alumni and the wonderful SURVEY. You all have made a fantastic contribution. Especially do I admire Mable Towery, who has given many years and concern in support of the alumni and SURVEY.

Beverly (Pruette)
Gregorius, M.D., BS'34
North Hollywood, CA

There is a slight possibility that I might be able to come to the Homecoming next June--I'm going to work on it.

Enclosed is my check for dues, etc. What does 12/12 mean on the address label?

[12/12 on your label means that you are a life member of the alumni association. Even though there are life members, which the alumni association still honors, we appreciate you sending your dues and SURVEY subscription each year, and to those of you who sent more than \$15 we are most grateful].

Elsie (Sanford)
Hamerly, N'29
College Place, WA

Enclosed is my gift to the alumni association plus my dues and SURVEY.

When you have the 1929 Honor Class again I sure hope to come, just for memory's sake. Most likely I will be the only one from the '29 nursing class.

I am helping as a pink lady in the hospital here at Walla Walla College.

100 years ago this year Dr. Sutherland was President at Walla Walla. Miss De Graw and Mrs. Sutherland were here to.

I am living at Walla Walla and enjoying it so very much. I am also enjoying good health. As long as I can be useful, I am thanking my Lord for all these extra years. I am 87 years old and active in Dorcas.

Van B. Jackson, SR, BS'57
Hendersonville, TN

It was a great opportunity and pleasure for me to attend Madison College from 1954-57, and to receive the BS degree in Agriculture. I learned of Madison College in 1953 while I was working as an instructor in Horticulture at the Pan-American Agricultural School near Tegucigalpa, Honduras, Central America. Mrs. Gregory, an Adventist for 30 years, told me of the work-study program at M.C. and the Christian atmosphere there. This appealed to me and I went to Madison. I worked on the farm under Mr. Lawrence Cantrell, in the dairy with Leon Gray, and later with Mr. Opie Cantrell in the milk plant; with Mr. Vernon Brady, in vegetables and fruit crops, with Mr. Culpepper in the Food Factory, and with Mr. John Brownlee. The experience I acquired in those departments has helped me in my professional work in agriculture and nutrition through these years.

I left Madison College in 1958 and returned to Honduras, to work in the Agricultural Extension Service.

In 1959 my wife Carrie and I accepted a call to Caribbean Union College near Port of Spain, Trinidad. Carrie was dean of women and I managed the farm and taught biology and agriculture. Elder Ivan T. Crowder was Head of the Religion Dept. at the college.

We left Trinidad in April of 1962 and went to La Paz, Bolivia, where I was employed by the United Nations Food and Agriculture Organization and UNICEF as the horticulturist assigned to the Integrated Program for agriculture and nutrition in the Andean region of Bolivia and Peru. The objective of the program was to improve the health of the people through better nutrition, which was achieved through rural school gardens, family gardens, and educating schoolteachers in vegetable production and food preparation. We worked with 37 school gardens in Bolivia and 92 school gardens in Peru, in the Lake Titicaca region and the southern Andean region near Potosi, Bolivia, not far from Paraguay. UNICEF provided garden tools and seed of 12 kinds of vegetables for the school and family garden projects. The teachers and pupils provided the labor to prepare the ground and plant the vegetables and to harvest them. We remained in Bolivia until the end of December 1964, and returned to Madison early in January 1965, then went on to the University of Tennessee in Knoxville. I attended U.T. from 1965-67, when I was awarded the Master of Science degree in Horticulture.

In 1969 I was called to Puerto Rico to teach agriculture and biology at Antillian College, which is the senior SDA college for the Antillian Union. While we were in Puerto Rico, Carrie completed her studies in nursing at the SDA Bella Vista Hospital School of Nursing at Mayaguez, Puerto Rico, having received the RN diploma in 1971. We returned to Madison in the summer of 1972, where we lived until 1977, when we moved to Hendersonville, TN. For the past 13 years I have been

working with Veterans Administration Medical Center in Nashville, TN, as Supervisor of the Grounds and Transportation Unit in the Engineering Department. My knowledge of botany, horticulture and landscaping, much of which I acquired at Madison College, enables me to accomplish my work in the beautification of the grounds and lawn maintenance in such an acceptable manner that I have received a number of letters of commendation and certificates of high performance from the Chief of Personnel Services and from the Medical Director of the Medical Center. I want to give a lot of the credit for my accomplishments to Madison College.

Our older son, Van Jr., was born at Madison Hospital in 1956. In 1985 he received a BS degree in Nursing from Vanderbilt University School of Nursing. Our other son, Andrew Henry, was born at the SDA Medical Unit in Port of Spain, Trinidad, in 1961. He graduated from Middle Tennessee State University in 1985 with a BS degree in airport management and is working with American airlines at the Nashville airport. Van Jr. is working in nursing in Raleigh, NC. Carrie has been working at TCMC for the past 12 years as a nurse.

I love Madison College and cherish the memories of the wonderful years we spent there. I especially remember Professor James Zeigler as an effective teacher and Christian gentleman. Also Prof. Ivan Peacock, with the same professional and Christian attributes. These are two of many people who dedicated their lives to Christian education so that it would be lived out through us--its alumni.

Madison College as a physical entity is no more, but it lives on in us as we reflect Christ's image to the world around us and attract others to Him for that great day of harvest when we shall go marching into God's Heavenly Kingdom. We thank those who have worked to keep the memory of Madison College alive.

Agnes E. Johnson, M.D.
N'22, BS'50
Loma Linda, CA

Was so happy to see so many of you last June. Hope we can make a trip that way again.

God is good--especially when I am among those so fortunate to know the Adventist truth to know that signs foretell Jesus is soon coming. How thankful I am.

Leonard A. Ramey, M.D., N'23
Napa, CA

I've been retired for 13 years. The last career in practice was 4 missionary trips to Africa, running hospitals and doing a lot of surgery.

Ethelyn (Jacobsen)
Reddig, N'45
Sylmar, CA

I will not be able to attend homecoming in June. It would be nice to see my classmates. It makes me sad to hear of all the changes of the campus. I grew up at Madison and it has many happy memories.

I have worked in the Glendale Adventist Medical Center for the last 18 years.

Keep up the good work.

Emmie Dee (Birdwell)
Robinson, N'31
Keene, TX

I enjoy the SURVEY so much. I paid \$50 for a life subscription, but I want to help to keep it going. I would like to hear more from the classes 1929-31.

Lasie Rokey Winn lives near and we like to talk about Madison. She will soon be 90 and is still going. She is active in our Senior Citizen activities.

Louise Russell, N'38
College Place, WA

Enclosed is my check for dues and SURVEY. I enjoy the SURVEY very much. I have a great interest in Madison. It provided an education

when it was seemingly impossible at the time for me to get an education. Lyle Miller told me about Madison. In Sept. 1938 I graduated from nursing. I want to tell you I am grateful and thankful for my education. I owe Madison College, TN, for what it gave to me. I am proud to be a Madisonite.

Carol A. Schaber, S'60-61
Dillingham, AK

I want to let you know that Ralph and I have moved from Moberly, MO and are now living in Dillingham, AK. It is 250 miles from the Aleutian Chain of Islands and on the Nushagak Bay. The town has a population of 2,500--most of the people are Eskimos. We are both working at the Kakanak Hospital operated by the Bristol Bay Area Health Center. Ralph is supervisor for the X-ray Dept. and Ultra Sound Dept. He does the ultra sound and helps his technician, do the X-rays. I have been doing transcription and filing in Medical Records. I was hired on as part time and my job ended on Jan. 3rd. I will more than likely be able to go back and do transcription in the spring.

We live in a new furnished condo apartment at the hospital compound. This is an area built especially for the hospital workers, doctors and dentists. There are 4 furnished condos for the workers and they each house 6 apartments. There are also duplex houses, double wide trailers and an 8-plex for single workers right by the hospital.

Dillingham is right out in the middle of the tundra with the bay to one side of it and a large river on the other side.

The only way we can get to the villages (50 near by) and to Anchorage is by airplane. There are no roads on the tundra except for the 6-mile road to the hospital from town and a 26--mile road to the town of Aleknagic, which is across a large lake. You get there by motor boat or row boat.

We love it up here in Alaska. Right

now we have about 2--1/2 feet of beautiful snow. We have learned to dress warm up here as we walk to work, which is about 275 steps, but on a cold and windy day it seems farther.

We have 3 children--2 boys and a girl. Our daughter Susan just gave birth to a daughter--Lisa Nicole, on Dec. 31 at 11:30 pm was nearly a 1992 baby. Susan and her family live in Shawnee, KS. Our son David and his family also live in Shawnee. Our son Wayne is a junior college student and this year he is a student missionary at Seoul, Korea teaching Bible and English at the training school in Seoul. He enjoys his boys there, and already 4 of his students are preparing for baptism.

I am Delain Cruzin's daughter. My mother still lives at Madison, TN in the Chippington Towers. My sister Judy Tomerlin still lives on campus in an apt. bldg.

Olga Speer, BS'41
Ardmore, OK

Thanks to those of you who keep the SURVEY coming. I enjoy it very much. I am thankful for the years I spent at Madison.

Mary Wilson, N'28
Hagerstown, MD

Enclosed please find my check my SURVEY subscription and for whatever else it is needed for.

Madison was a great school and many young people were helped to obtain a religious and secular education who otherwise could not have obtained one. Too bad Madison had to close its doors to many out there who are eager to receive a Christian education.

I thank God for Madison and what it did for me. I became an SDA at Madison and was baptized in the Cumberland River. The faculty members and teachers set good examples before the students, which helped to strengthen my faith in our Lord, and it might be that my religious training at Madison could have had some influence on my

family's spiritual life. Several members of my family are faithful members of our SDA church.

Frank Velazquez, Anes., '69
Loveland, CO

I am more than glad to send money to keep Madison College Alumni Association alive. It has survived much longer than I anticipated it would. Money is not the only thing that will keep MCAA alive, but people like you that are willing to work hard to keep it going. It is a lot easier to support it financially than to make a contribution of time.

My wife Marge and I were married at Madison in 1962 and continued to live there until 1969, when I finished anesthesia and moved to Virginia. We moved from Virginia about 12 years ago to join an anesthesia group that Bill Howard started in 1963, here in Loveland. Our 2 daughters, Maria and Michelle, attended Campion Academy and subsequently Maria graduated from Union College with a B.S. degree in nursing and Michelle from PUC with a B.S. degree in public relations. They are both married. Maria works parttime at Porter Hospital in Denver. She has 3 little girls. Michelle lives in Angwin, CA and works for PUC in the department of public relations. We love living in Colorado and invite our friends to enjoy a good Colorado vacation and stop and see us.

LETTERS

Juanita (Standish)
Gosse, MCA
Loma Linda, CA

Enclosed is my subscription to the SURVEY.

My dad was H.E. Standish, who was connected with Madison for 15 or 16 years. He was responsible for the design and for building the arched connection of the old frame cottages, which was called "Old General." My dad was also the

architect who supervised the building of the stone structures on campus. He also taught the Industrial classes at the college. His department was in the basement of the administration building. Prior to that, his work was done in the row of shops down behind the food factory.

Oh, how many memories I have of my childhood at Madison--a wonderful place to have grown up.

I was not aware of the offer of the hospital photograph which was advertised in 1991, and I would dearly love to have one.

Elsie (Gibbons)
Worthen, MCA
Hendersonville, NC

I was Elsie Gibbons while at Madison--sister of JoAnn and Jack Gibbons. I graduated from the academy in 1955 and married Jack Worthen in 1956. I did not get my B.S. degree in nursing, but after having 4 children I went back to school to become an L.P.N. I am now divorced and have 7 grandchildren. I work at Park Ridge Hospital.

50th WEDDING ANNIVERSARY

DUNN-BRYANT

Bill, BS'42 and Vesta (Dunn), 'BS'42, Bryant celebrated their 50th anniversary on June 22, 1991. There was a reception in their honor at Two Rivers Mansion in Nashville, following the wedding of their daughter Nancy to David Wayne Piper, an attorney in Nashville.

Bill and Vesta met at Madison College. They were married in 1941 in a garden ceremony at the home of the bride in Madison, TN. They finished their last year of college after marrying. Bill was president of their Senior Class.

Vesta was born in Madison, TN, and attended Peabody College for teachers before graduating from

Madison College in 1942. She has subsequently earned a Master's degree in Public health from Loma Linda University.

Bill was born in Pensacola, FL, where he graduated from High School. He took the train north to attend college at Southern Junior College in Collegedale, TN, where he worked in the dairy in addition to attending school.

In 1947 he received the M.D. degree from Loma Linda University (then named the College of Medical Evangelists) near Los Angeles, CA. He subsequently served one year as an intern at Nashville General Hospital and one year of further postgraduate residency training in general (or family) practice at Madison Hospital.

Vesta taught elementary school for one year at Gallatin, TN and later taught for 1-1/2 years in San Bernadino, CA and one year at Hendersonville, TN. For the past 5 years she has taught elementary school in Cannon County.

Since girlhood, Vesta has been a tennis enthusiast. She was girls' singles champion in 1935 and 1938 in Nashville. She was girls singles runner-up in the Southern region in 1937.

Fulfilling an obligation to the U.S. Army, Bill spent 15 months in Germany in 1949-1950. He took his family--by then increased by two sons, Rodney, born in 1945, and Gary, born in 1947--with him. Together, they saw much of Europe, traveling during leaves from Army Medical Service.

Bill and Vesta moved to Woodbury, TN in 1950. They helped found the Woodbury SDA Church in 1955 and the Woodbury SDA School (which was located on their farm for many years) in 1958.

Dr. William Bryant has practiced medicine in Woodbury since 1950, and has served as chief-of-staff of the hospital staff on numerous occasions over four decades, as well as member of the governing board. He now practices medicine in Woodbury.

Vesta and Bill have 3 children, all

of whom are medical professionals. Rodney and Gary are M.D.s and Nancy is an RN who works as an Administrator for a National Managed Care Company located at Brentwood, TN near Nashville.

Dr. & Mrs. Bryant also have two "foster daughters"; Brenda (Bedwell) Hixson and Sandra (Bedwell) Somerville. They both live in Chattanooga, TN and both are RNs.

Vesta for many years was Pathfinder Leader for the Woodbury Church and through that means influenced and assisted many, many more children in the County.

When Vesta and Bill Bryant came to Cannon County more than 40 years ago there was no church here, and church teachings and ideas had little or no influence here. Their efforts over the years have played a major, even crucial, role in putting Woodbury "on the map" of the SDA Church; and the good effects of their leadership, support and desire to see the influence of the church expand, and have ramifications that defy enumeration.

OBITUARIES

ROBERT S AMMUNDSEN

Robert Ammundsen was born May 12, 1912, and died Jan. 27, 1992, at age 79.

Robert was raised in St. Paul, MN. He moved to Portland, OR with his family in 1927 and was a graduate of Portland Junior Academy. He graduated in 1950 with a B.S. in agriculture from Madison College.

He worked for the Conservation Bureau for several years and later worked in the engineering dept. at the Portland San. and Hosp. until his retirement in 1977.

Robert was a member of the Gresham Adventist church. Following his retirement he was involved in volunteer projects for the church.

Survivors include his wife of 53 years, Judy (Anderson) S'49-50; daughters, Joyce Anliker of Milton-Freewater, OR, and Gail Nelson of Gresham, OR; and sister Gladys

Graf of Salem, OR.

EMMET V. AYERS, M.D.

Dr. Emmet Ayers passed away May 5, 1990.

These are some facts about Dr. Ayers gathered over the years.

Emmet was a student at Madison College from 1926-28. He painted the Madison San. & Hosp. in 1929. Emmet graduated from the University of California with his M.D. and took his intern and surgical residency at the San Diego California Hospital. He was in the army during WWII for 2 years. His special was General Surgery practice in 1948. He operated 2 extended care facilities, had a farm and started a shopping center in 1968.

Emmet was married to Marion (Spurbeck).

JIM BELIZO

Jim Belizo, past president of Stone Cave Farms, passed away in February of this year from complications following open heart surgery.

RALPH C. CLINE

Ralph Cline, was born in Williamsport, PA in 1912 and died Oct. 3, 1991 in Jersey Shore, PA, at age 79.

Ralph was a member of the Williamsport church and graduated from Madison College School of Nursing with a B.S. in 1950.

Survivors include his wife Lucille (Burgess) Cline, N'49, and 6 sons: Micheal of Williamsport, PA, Jerry of Burnwick, PA, Ralph of Loma Linda, CA, Eldon and Richard both of Corona, CA and Edward of San Diego, CA; 2 brothers, Earl of El Cahon, CA, Guy of Clarksville, TN.

Jack Spencer Darnall

Jack Darnall was born Dec. 30, 1925 in Sacramento, CA and passed away Aug. 21, 1990 in Loma Linda, CA. He served as a teacher and pastor in the Ga-Cumb, KY-TN, and UC conferences. He also worked

closely with the General Conference Youth Department in developing wilderness living programs for youth. Survivors include his wife, Miriam; 2 daughters, Sherilyn Shumate and Shonna.

JOHN DOVICH

John Dovich was born July 7, 1936 in Brockington, Saskatchewan, Canada to Walter and Helen Dovich. John was one of 10 children. He worked in lumbering and attended Okanagan Academy in Kelowna, Canada, before continuing his education at Madison College, and Branson Hosp. in Willowdale, Canada. John graduated from Madison College in 1961 with a B.S. in Industrial Arts/Industrial Education, and minors in Bible and Education. He in the 1960-61 edition of "Who's Who Among Students in American Universities and Colleges."

After graduating, John, his wife, and their new son, Steven, spent a year in Honduras, Central America, while he taught and worked on construction projects. After returning to Canada, he taught for 5 years in Saskatchewan public high schools, where he established a new Industrial Arts program.

In 1968 John began his work at the South Lancaster Academy in MA. He solicited funds and equipment for the Industrial Arts program and built a new building to house the dept.

In 1972, John completed his MA in Industrial Education at Fitchburg State College. He then left with his family on a mission assignment to the West Indies where he developed a new Industrial Arts Program for Carribean Union college in Trinidad.

In 1976, John and his family moved to Holly, MI where John taught Industrial Arts at Adelpian Academy before taking up truck driving. John liked to keep busy, and enjoyed doing yard work, woodworking and fixing things, especially his 1956 Pontiac Convertible. He built 2 Industrial Arts

buildings, a church, and 3 family homes.

In 1983 John solicited funds and equipment for Uruguay Academy where he was planning to participate in an April Voice of Prophecy project to build a church and hold evangelistic meetings in Kiev, Russia.

John was a member of the Holly Adventist church where he was an elder and SS teacher for many years.

He is survived by wife, Luvamay, and children; Steven and Sherri Dovich of Andover, MA, Laurel Dovich of Ann Arbor, MI, Sharon and Michael Szykowski of Holly, MI, Douglas Dovich of Pontiac, MI, and Shirley Dovich at Andrews University.

DR. CHARLOTTE HOLMES CHAMNESS

Dr. Charlotte Holmes passed away quietly at her home in Pegram, TN Nov. 23, 1991. She is survived by her husband of 1 year, Don Chamness.

We do not have an obituary for Charlotte, but we would like to tell you a little about her.

Dr. Holmes attended Ellen White's funeral when she was 10 years old. She was Sister White's next door neighbor as a little girl and had fond memories of her.

In 1986 the National Health Federation posthumously gave its presidents award to Ellen White for her contributions to the natural health cause. The NHF is not a SDA organization. Dr. Charlotte Holmes was selected to receive this award posthumously for Ellen White because they thought that Charlotte epitomized the spirit of her.

Charlotte graduated from Loma Linda university as an M.D. She did not use drugs at all for the last 50 years of her practice. She was an herbalist and was known for her dynamic infectious enthusiasm. Her late husband affectionately gave her the name Fireball, because of her high energy level and contagious

enthusiasm.

LILA (WEST) LUNDQUIST

Lila Lundquist of Portland, TN was born May 6, 1902 and died Feb. 18, 1992 at age 89.

Lila was the daughter of Forrest and Lula West, founders of Fountain Head Sanitarium and rural school, now known as Highland Academy.

Lila went to Madison College in 1933. She was an artist, and avid natural foods and organic gardening promoter. She was a long-time member of the Highland SDA Church.

She was preceded in death by brother, Leonard R. West; and a grandson, Michael Lundquist.

Survivors include her husband, John; daughter, Ruth Key, Portland, TN; and son, Bobby Lundquist of Columbia, TN; sister, Myrtle Fuller and brother, Don L. West, both of Collegedale, TN.

DEMA (HOATEN) WILLE

Dema Wille died in a nursing home near Denver, CO in the first week of January, 1992. She was in her late 80's. Dema had outlived all her immediate family.

Dema was a student at Madison College from 1929-1932 and graduated from the nursing course. She worked at Porter, St. Lukes, Presbyterian and Swedish hospitals in Denver. Dema retired in 1974 and helped care for relatives and neighbors.

Dema's husband preceded her in death in 1960.

SHIRLEY DOVICH

Shirley Dovich daughter of John Dovich, BS'61 died Feb. 24, 1992 at age 19 in a car accident along with fellow Andrews freshman Gregory Berger.

Shirley graduated whit honors from Great Lakes Academy and was a pre-physical therapy student at Andrews University.

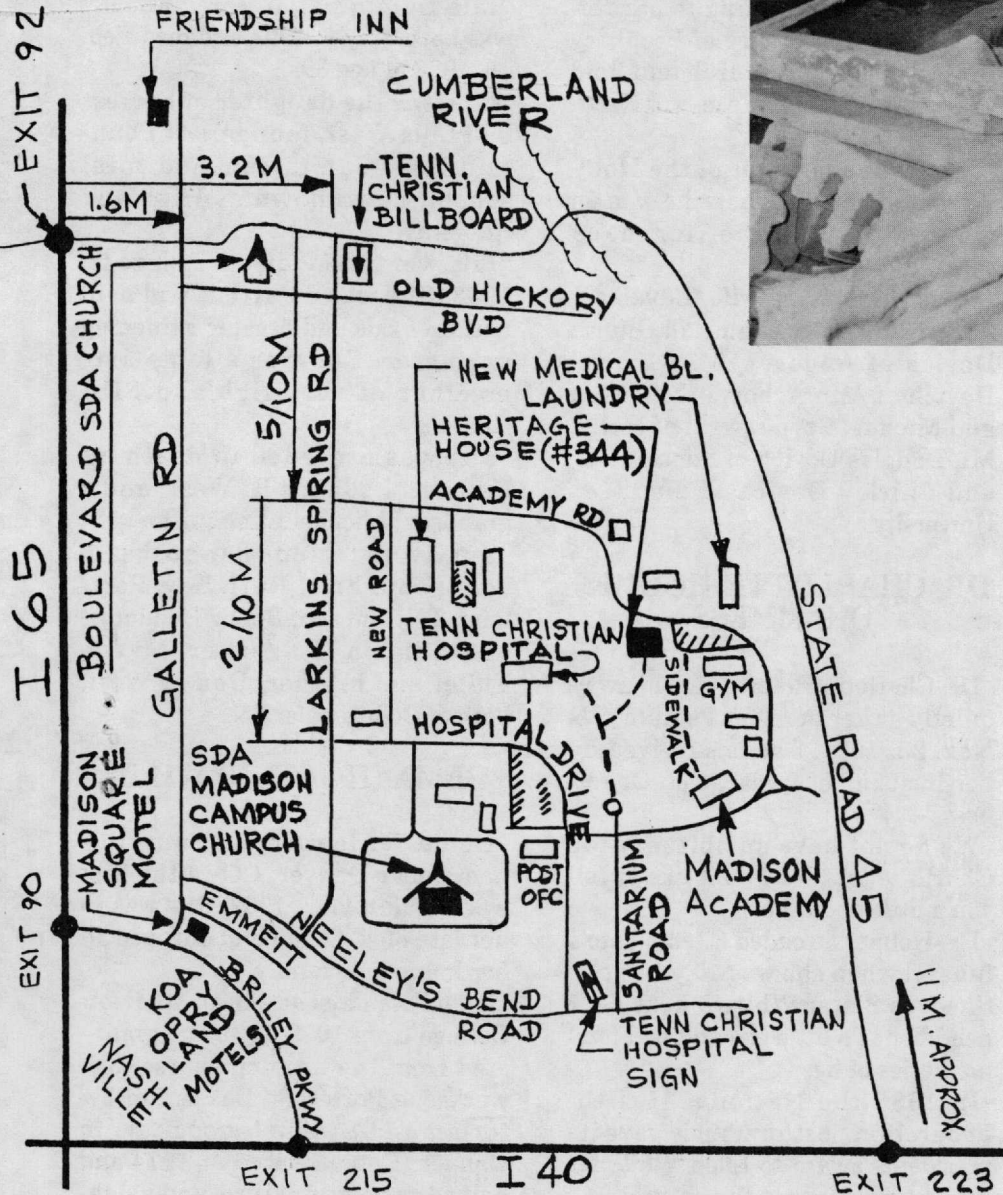

This is a picture of the well discovered under the Druilard Library when it was being torn down. If you have any information about this well, when it was dug, what it was dug for, was it used, etc. please tell us.
