Peter Edgar Hare Collection

(Collection 247)

Scope and Content

Peter Edgar Hare (Apr 14, 1933 to May 5, 2006) was born in Maymyo, Burma, to missionary parents, Eric and Agnes Hare. He graduated from Pacific Union College in 1954 and married Patti Martin. In 1955 he completed a master's degree from University of California Berkeley and returned to Pacific Union College to teach chemistry. He earned his PhD in organic geochemistry from Caltech in 1962. The next year he began to work with the Carnegie Institution of Washington, D.C.'s Geophysical Laboratory as a research scientist where he remained for 35 years. He developed an amino acid age-dating technique and collaborated with scientists around the world ("Hare, Peter Edgar, *Daytona Beach News*, Journal Online-Deaths, May 10, 2006).

This collection contains biographical materials, appointment calendars, his dissertation, and some writings. The collection bulk consists of Hare's personal files in relation to the subject of science and religion. There are also a few VHS video recordings, CDs and cassettes of his seminars and family events.

Arrangement

The arrangement of the collection is as it was received by the Center. Patti Hare, Peter's wife, did some organizing before donating it to the Center. The bulk is arranged topically in alphabetical order.

Provenance

This collection was given to the Andrews University Adventist Heritage Center by Peter Edgar Hare through his wife, Patti. The transfer began January 2004 and additional materials were received three other times during the first half of 2004.

Use

All users of this collection will complete the "Application to Use Unpublished Records," and observe the regulation specified in the "Patron's Agreement" and "Researcher's Code of Conduct." All records in this collection are open and available for research. Suggested citation for this collection:
